Reforming Legislatures

Peeverill Squire, 2024-06-26 Winner of the 2025 Virginia Gray Book Award APSA Section 22 State Politics and Policy Legislatures are ubiquitous in the American political experience First created in Virginia in 1619 they have existed continuously ever since Indeed they were established in even the most unlikely of places notably in sparsely populated frontier settlements and functioned as the focal point of every governing system devised Despite the ubiquity of state legislatures we know remarkably little about how Americans have viewed them as organizations in terms of their structures rules and procedures But with the rise of modern public opinion surveys in the twentieth century we now have extensive data on how Americans have gauged legislative performance throughout the many years That said the responses to the questions pollsters typically pose reflect partisanship policy and personality Generally respondents respond favorably to legislatures controlled by their own political party and those in power during good economic times Incumbent lawmakers get ratings boosts from having personalities home styles that mesh with those of their constituents These relationships are important indicators of people's thoughts regarding the current performance of their legislatures and legislators but they tell us nothing about attitudes toward the institution and its organizational characteristics This study offers a unique perspective on what American voters have historically thought about legislatures as organizations and legislators as representatives Rather than focusing on responses to surveys that ask respondents how they rate the current performance of lawmakers and legislatures this study leverages the most significant difference between national and state politics the existence of ballot propositions in the latter At the national level Americans have never had any say over Congress's structure rules or procedures In contrast at the state level they have had ample opportunities over the course of more than two centuries to shape their state legislatures The data examined here look at how people have voted on more than 1 500 state ballot propositions targeting a wide array of legislative organizational and parliamentary features By linking the votes on these measures with the public debates preceding them this study documents

not only how Americans viewed various aspects of their legislatures but also whether their opinions held constant or shifted over time. The findings reported paint a more nuanced picture of Americans' attitudes toward legislatures than the prevailing one derived from survey research. When presented with legislative reform measures on which concrete choices were offered and decisions on them had to be made, the analyses presented here reveal that counter to the conventional wisdom that people loved their representatives but hated the legislature, voters usually took charitable positions toward the institution while harboring skeptical attitudes about lawmakers' motives and behaviors.

Official Master Register of Bicentennial Activities American Revolution Bicentennial Administration, 1974 *California State Publications*, 2000 *Handbook of Education Policy Research* Gary Sykes, Barbara Schneider, David N. Plank, 2012-09-10 Co published by Routledge for the American Educational Research Association. AERA Educational policy continues to be of major concern. Policy debates about economic growth and national competitiveness for example commonly focus on the importance of human capital and a highly educated workforce. Defining the theoretical boundaries and methodological approaches of education policy research are the two primary themes of this comprehensive AERA sponsored Handbook. Organized into seven sections, the Handbook focuses on 1 disciplinary foundations of educational policy 2 methodological perspectives 3 the policy process 4 resources management and organization 5 teaching and learning policy 6 actors and institutions and 7 education access and differentiation. Drawing from multiple disciplines, the Handbook's over one hundred authors address three central questions: What policy issues and questions have oriented current policy research? What research strategies and methods have proven most fruitful? And what issues, questions, and methods will drive future policy research? Topics such as early childhood education, school choice, access to higher education, teacher accountability, and testing and measurement cut across the 63 chapters in the volume. The politics surrounding these and other issues are objectively analyzed by authors and commentators. Each of the seven sections concludes with two commentaries by leading scholars in the field. The first considers the current state of policy design and the second addresses the current state of policy research. This book is appropriate for scholars and graduate students working in the field of education policy and for the growing number of academic government and think tank researchers engaged in policy research. County Poll Workers in California Elaine M. Howle, 2009-02. Addresses the role of the Office of the Sec of State of CA in providing guidelines to county elections officials for training poll workers. In 2006 the office adopted poll worker training guidelines that establish a minimum set of requirements that counties must meet. However, the guidelines do not cover the rights of voters who register to vote without declaring a political party affiliation. The law does not require the office to update the training guidelines and it has not done so since 2006. Nevertheless, mgmt stated that the office plans to update the guidelines. During the Feb 2008 primary election, the office visited 31 counties and afterwards shared its info with each county to help identify how to strengthen their
