State Of Ohio Report Cards:

Organizational Report Cards William T. Gormley Jr., David L. Weimer, 1999-03 In recent years consumers professional organizations government officials and third party payers have become increasingly concerned about how to assess the quality of the services provided by organizations in both the private and the public sectors One new approach is the organizational report card which compares the performance of organizations such as public schools colleges hospitals and HMOs This book offers the first comprehensive study of such instruments It discusses the circumstances under which they are desirable alternatives to other policy instruments such as regulation how they should be designed who is likely to use them and for what purpose and what role if any government should have in their creation Informed by cases drawn from education health and other policy areas this book develops a conceptual framework for analyzing these issues It explores the tradeoffs in measuring performance the methods of communicating results effectively to mass and elite audiences and the ways in which organizations respond to the data gathered *Report Cards for Kindergarten and Elementary Grades* Rowna Catherine Hansen, 1931 **Development Report Card for the States**, 1998 New Developments in Pupil Report Cards ... Theory and Research in Educational Administration Vol. 1 Cecil Miskel, Wayne K. Hoy, 2002-03-01 This series is dedicated to advancing our understanding of schools through empirical study and theoretical analysis Scholars both young and established are invited to publish original analyses but we especially encourage young scholars to contribute to Theory and Research in Educational Administration This first issue provides a mix of beginning and established scholars and a range of theoretical perspectives Eight separate but related studies were selected for this first issue Three of the research pieces deal with the intended and unintended consequences of policy and political initiatives in schools Do high stakes accountability environments threaten the potential of learning organizations Marks and Printy grapple with that question Not surprisingly they anticipate the latent dysfunctional consequences of high stakes accountability as they provide a careful analysis of urban school district responses to state policies Well intended initiatives produced unintended consequences that threatened the

capacity for organizational learning in these schools In a similar fashion Jones and Malen s findings suggest that political strategies that use insider dynamics can foster successful enactment of reforms but often at a cost of undermining efforts to implement the policy Song and Miskel focus their analysis on national reading policy An examination of national interests groups and policymakers suggests that an assessment of various groups influence is necessary if policy actors are to make sensible judgments in choosing allies and building coalitions for effective actions Two of the papers are informed by contingency theory Ogawa and Studer are concerned with the relationship between the school and its community They propose that both buffering and bridging strategies enable schools to deal with parents effectively Because schools depend on parents for resources they bridge to parents in cooperative fashion but because parents often pose uncertainty schools also buffer parent influence by limiting their access Yet there is divergence from contingency theory because schools depend primarily on parents to provide socio cultural rather than material resources hence schools often use strategies that shape rather than diminish dependence on parents Rowan also draws ideas from contingency theory to examine the extent to which the nature of teachers instructional work affects patterns of instructional management in schools His data support the explanation that teachers who face increased task variety actively work to construct organic patterns of instructional management to reduce task uncertainty and to increase workplace motivation and commitment Three papers examine teachers in schools Rowan is intrigued by the variation in the nature of teachers work both in terms of task variety and task uncertainty He finds that teachers do not see their work as many organizational theorists do that is as a non routine form of work in fact teachers view teaching as either as a routine task or expert task In spite of the fact that many teachers endorsed a constructivist view of teaching few concluded it was a non routine task Moreover teachers in different disciplines have different views about both the nature of academic knowledge and desirable teaching practices Both Goddard and Hoy and his colleagues use social cognitive theory to develop an argument of the importance of collective efficacy in positively influencing student achievement Hoy Smith and Sweetland build on their earlier work to demonstrate that collective efficacy of schools is pivotal in explaining student achievement in a sample of rural schools Goddard shows that that collective efficacy is also an important predictor of the practice of involving teachers in important school decisions He concludes that the more we learn how school practices are related to collective efficacy the more we will know about what school leaders
