Global Education Monitoring Report Global Education Monitoring Report Team, UNESCO, 2021-12-31. Non-state actors' role extends beyond provision of schooling to interventions at various education levels and influence spheres. Alongside its review of progress towards SDG 4 including emerging evidence on the COVID-19 pandemic's impact, the 2021-2 Global Education Monitoring Report urges governments to see all institutions, students and teachers as part of a single system. Standards, information, incentives and accountability should help governments protect, respect and fulfil the right to education of all without turning their eyes away from privilege or exploitation. Publicly funded education does not have to be publicly provided but disparity in education processes, student outcomes and teacher working conditions must be addressed. Efficiency and innovation rather than being commercial secrets should be diffused and practised by all. To that end, transparency and integrity in the public education policy process need to be maintained to block vested interests. The report's rallying call 'Who chooses? Who loses?' invites policymakers to question relationships with non-state actors in terms of fundamental choices between equity and freedom of choice between encouraging initiative and setting standards between groups of varying means and needs between immediate commitments under SDG 4 and those to be progressively realized, e.g. post-secondary education and between education and other social sectors.

Class War Megan Erickson, 2015-09-08. What America has at stake when some children go to school hungry and others ride in 1,000 strollers. In an age of austerity, elite corporate education reformers have found new ways to transfer the costs of raising children from the state to individual families. Public schools tasked with providing education, childcare, job training, meals and social services to low-income children struggle with cutbacks. Meanwhile, private schools

promise to nurture the minds and personalities of future professionals to the tune of 40 000 a year As Class War reveals this situation didn't happen by chance In the media educational success is framed as a consequence of parental choices and natural abilities In truth the wealthy are ever more able to secure advantages for their children deepening the rifts between rich and poor The longer these divisions persist the worse the consequences Drawing on Erickson's own experience as a teacher in the New York City school system Class War reveals how modern education has become the real hunger games stealing opportunity and hope from disadvantaged children for the benefit of the well to do *Teachers and Their Unions* Todd A. DeMitchell, 2020-01-15 *Teachers and Their Unions* Labor Relations in Uncertain Times explores the decade of uncertainty in public education following the Great Recession by first laying a foundation that describes the development of teachers and public education and the rise of teacher unions The selection of the industrial labor model at the outset of public sector collective bargaining set the table for challenges to its fit with education The theme of teacher as member of a union and teacher as a professional is explored within the context of a collective bargaining environment The section Law and Politics in Uncertain Times Retrenchment and Assault explores the decade of uncertainty It reviews the industrial union model and within the twin challenges of the conundrum of teacher as union member and professional in the struggles of the decade Tenure boondoggle or necessary protection VAM rank and yank right to work agency fees and teacher strikes are explored within the themes of the industrial union model and the tension of union member and professional The book concludes with thoughts for the future and responds to the question of whether teacher unions are still pertinent
