- Science/Physics

Duration: 30 minutes

Description: A learning cycle format for inquiry teaching. Journal about what students think causes a lightbulb to light up when rubbed with a plastic bag. Then several activities for students to explore how static electricity works. An opportunity to use knowledge learned and get an accurate assessment of students' understanding of static.

Goals: To teach through inquiry method about static electricity. For students to learn these main points about static electricity:

- * Positive and negative charges attract each other.
- * Charges can jump from one object to another when there is a build-up of electrons.
- * This build-up is called static electricity.

Objectives:

Students will be able to explain how static electricity works in journal entry. They will also show how objects can become negatively charged and attract other objects, causing static electricity.

Materials:

balloons, salt, pepper, plastic rulers, cloth or wool, torn up pieces of paper, paper plates, questions for each activity
