Painting the Inhabited Landscape Margaretta M. Lovell, 2023-03-27 The impulse in much nineteenth century American painting and culture was to describe nature as a wilderness on which the young nation might freely inscribe its future the United States as a virgin land that is unploughed unfenced and unpainted Insofar as it exhibited evidence of a past its traces pointed to a geologic or cosmic past not a human one The work of the New England artist Fitz H Lane however was decidedly different In this important study Margaretta Markle Lovell singles out the more modestly scaled explicitly inhabited landscapes of Fitz H Lane and investigates the patrons who supported his career with an eye to understanding how New Englanders thought about their land their economy their history and their links with widely disparate global communities Lane s works depict nature as productive and allied in partnership with humans to create a sustainable balanced political economy What emerges from this close look at Lane s New England is a picture not of a virgin wilderness but of a land deeply resonant with its former uses and a human history that incorporates rather than excludes Native Americans as shapers of land and as agents in that history Calling attention to unexplored dimensions of nineteenth century painting *Painting the Inhabited Landscape* is a major intervention in the scholarship on American art of the period examining how that

body of work commented on American culture and informs our understanding of canon formation **Clinical**
