Sotho Nsc Question Papers For 2015

Julie Allan, Alfredo J. Artiles

Sotho Nsc Question Papers For 2015:

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02
South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience. World Yearbook of Education 2017 Julie Allan, Alfredo J. Artiles, 2016-12-01 This latest volume in the World Yearbook of Education series examines the relationship between assessment systems and efforts to advance equity in education at a time of growing inequalities. It focuses on the political motives behind the expansion of an assessment industry, the associated expansion of an SEN industry and a growth in consequential accountability systems. Split into three key sections, the first part is concerned with the assessment industry and considers the purpose and function of assessment in policy and politics and the political context in which particular assessment practices have emerged. Part II of the book on assessing deviance explores those assessment and identification practices that seek to classify different categories of learners including children with Limited English Proficiency with special needs and disabilities and with behavioural problems. The final part of the book considers the consequences of assessment and the possibility of fairer and more equitable alternatives examining the production of inequalities within assessment in relation to race, class, gender and disability. Discussing in detail the complex historical intersections of assessment and educational equity with particular attention to the implications for marginalised populations of students and their families, this volume seeks to provide reframings and reconceptualisations of assessment and identification by offering new insights into economic and cultural trends influencing them. Co-edited by two internationally renowned scholars, Julie Allan and Alfredo J. Artiles, World Yearbook of Education 2017 will be a valuable resource for researchers, graduates and policy makers who are interested in the economic trends of global education assessment.
