Standard Treatment Guidelines For Primary Hospitals Ethiopia:

Joint external evaluation of the International Health Regulations (2005) core capacities of South Sudan World Health Organization, 2025-09-30 South Sudan conducted its second Joint External Evaluation JEE of its International Health Regulations IHR core capacities from 16 to 20 September 2024. The evaluation aimed to identify areas for improvement and strengthening of the essential capacities needed to effectively detect, prevent, and respond to public health emergencies. The evaluation spanned 19 technical areas broadly categorized under Prevent, Detect, Respond, and Other IHR-related hazards, with the overarching goal of guiding the nation's development of its comprehensive National Action Plan for Health Security. This JEE was a collaborative effort involving national experts and international stakeholders, including the World Health Organization (WHO) and technical experts from various countries and institutions.

Rural Health - Investment, Research and Implications Christian Rusangwa, 2023-11-15 In this eye-opening exploration, the authors bring together years of research on the ground, insights, and a vision for the future of rural health. Through engaging narratives, data-driven analysis, and thought-provoking case studies, this book sheds light on the critical issues that affect the well-being of millions living outside urban centers. Rural Health Investment, Research, and Implications is an essential read for healthcare professionals, policymakers, researchers, and anyone passionate about the well-being of rural communities. It offers a roadmap to a brighter, healthier future for those often left in the shadows, highlighting the immense potential of rural America and the transformative power of investment and research in shaping a more equitable healthcare landscape. Join the conversation, be part of the solution, and uncover the untapped potential of rural health. This book is a call to action for a healthier, more inclusive future for all.

Joint external evaluation of the International Health Regulations (2005) core capacities of Ethiopia World Health Organization, 2025-08-20 The primary goal of the Joint External Evaluation JEE in Ethiopia was to assess capacities in 19 technical areas to comply with the International Health Regulations 2005 IHR. The exercise was held from 18 to 22 September 2023 in Bishoftu. The evaluation showed areas for improvement but importantly, areas that provided a strong foundation for the work of health security preparedness, including application of the whole-of-government approach in IHR implementation due to strong political will, presence and availability of several legal instruments, policies, and guidelines for IHR implementation, significant partner support towards a strong health security preparedness structure in the country, existence of a very strong multisectoral coordination mechanism for public health response, the presence of a very robust One Health platform at both national and regional levels, strong robust IHR technical leadership and stewardship. There is recognized capacity to implement IHR in all assessed 19 technical areas to achieve the required minimum core capacities. There is a need for continuous training of key cadres across the relevant sections and sectors, and this will go a long way to strengthen the existing mechanisms and capacities of Ethiopia to respond to public health events and major public health risks.

Khashu, Karel Allegaert, 2025-01-27 Neonates and infants have been referred to as therapeutic orphans due to the overall scarcity of treatments that have been developed and tailored to their needs However in recent years there have been increased efforts by researchers and regulatory bodies to focus on the provision of drugs devices and treatment modalities tailored for pediatric use This trend is also being witnessed in neonatology but a lot more needs to be done This Research Topic aims to capture the latest research reviews and scientific opinion on new drugs devices diagnostics monitoring modalities and therapeutic models in neonatology This includes specific products like drugs and medical devices used in the detection monitoring or management of various neonatal conditions such as Bronchopulmonary dysplasia Neonatal seizures Malabsorption and poor growth Necrotizing enterocolitis Hypoxic ischemic encephalopathy Retinopathy of prematurity Pediatric short bowel syndrome Respiratory distress syndrome Congenital hyperinsulinism Neonatal infections and Sepsis

Cumulated Index Medicus ,1999 Ethiopian Medical Journal ,2010 **Nutrition in Vulnerable Groups** Enbo Ma, Yukiko Wagatsuma, 2024-09-19 Nutrition requirements vary in children pregnancy and the elderly for the physiological difference in the body To maintain good health and prevent diseases the adequacy of nutrients is essential and adherence to healthy diets recommended needs to be monitored Uncertain physical social cultural and economic situations limit access to nutritious intake and impact health both in the developing e g wasting stunting underweight and mineral vitamin related malnutrition and developed e g obesity worlds However a healthy diet is not only determined by food safety and quality but

also by food education nutritional practice during the life stages and food availability and accessibility to the population This is true in developing countries but also in developed ones where vulnerable groups including people living in conditions of poverty unemployment lack of schooling people with forms of addiction and ethnical minorities struggle to adhere to healthy diets and choose cheaper and often unhealthy options As a consequence excessive consumption of limited nutrients and inappropriate supplementation becomes as unhealthy as not consuming enough In the past three years the pandemic of COVID 19 has put significant troubles on human society exacerbating hard life conditions in vulnerable groups and worsening their adherence to healthy lifestyles and food choices Therefore the nutrition and diet related health issues in vulnerable people must be highlighted and followed up
