Nursing: Essential Knowledge for the Profession* Susan M. DeNisco, 2023-02-07 *Advanced Practice Nursing Essential
Knowledge for the Profession* Fifth Edition is a core advanced practice text used in both Master's Level and DNP programs
This text is centered around a compilation of existing chapters from a variety of high level Jones Bartlett Learning works
creating a comprehensive and well rounded resource for the advanced practice nursing student *COLLABORATE(R) for
Professional Case Management* Teresa Treiger, Ellen Fink-Samnick, 2015-04-15 This book is about the progressive
improvement of case management beyond that which it exists to that of a practice specialty focused on professionalism and
collegiality across all practice settings Our desire to produce a framework for such practice began when we connected
several years ago It was a result of a dialogue the sharing of our stories and experiences Separately we were already
passionate about and committed to case management excellence Together our vision coalesced to form this competency
based framework for advancing case management captured by an acronym which defined the essence of professional
practice COLLABORATE We spent hours discussing the implications of a perceived epidemic involving less than productive
interactions between individuals working under the title of case manager with consumers providers and clinical colleagues
These accumulated experiences heightened our commitment to lead much needed change Our conversation endured over
many months as we realized a shared Respect for case management's rich heritage in healthcare across professional
disciplines and practice settings Concern for those factors which devalue case management's professional standing
Agreement that while the practice of case management transcends many representative professional disciplines and
educational levels each stakeholder continues to cling to their respective stake in the ground and Belief of the importance for
case management to move from advanced practice to profession once and for all COLLABORATE was borne from a vision the
mandate to solidify a foundation for case management practice which combines unique action oriented competencies
transcends professional disciplines crosses over practice settings and recognizes educational levels The ultimate focus is on
improving the client's health care experience through the promotion of effective transdisciplinary collaboration
COLLABORATE recognizes the hierarchy of competencies and practice behaviors defined by the educational levels of all
professionals engaged associate bachelors masters and doctoral degrees across practice disciplines Through this approach
every qualified health and human service professional has a valued place setting at case management's ever expanding table
Each of the competencies are presented as mutually exclusive and uniquely defined however all are complementary and call
on the practitioner to conduct work processes in a wholly integrated manner While appearing in order for the acronym's sake
they are not necessarily sequential Ultimately case management is an iterative process When united in a comprehensive and

strategic effort the COLLABORATE competencies comprise a purpose driven powerful case management paradigm The agility of this model extends to use of key concepts that include both action oriented verbs and nouns which are significant elements in any professional case management endeavor To date case management practice models have been driven by care setting and or business priorities Unfortunately this exclusivity has contributed to a lack of practice consistency due to shifting organizational and regulatory priorities However this is only one reason for a fragmented case management identity COLLABORATE recognizes and leverages these important influencers as critical to successful practice and quality client outcomes Interprofessional education and teamwork are beginning to emerge as the means to facilitate relationship building in the workplace Through this approach health care practitioners absorb the theoretical underpinning of intentionally work together in a mutually respectful manner which acknowledges the value of expertise of each care team stakeholder This educational approach provides the opportunity to engage in clinical practice that incorporates the professional standards to which we hold ourselves accountable Innovative and emerging care coordination models defined by evidence based initiatives appear across the industry Each promotes attention to interprofessional practice in order to achieve quality patient centered care Herein lies an opportunity to demonstrate the value drawn from diverse expertise of case managers comprising the collective workforce However a critical prefacing stage of this endeavor involves defining a core practice paradigm highlighting case management as a profession The diverse and complex nature of population health mandates that case management intervene from an interprofessional and collaborative stance While inherent value is derived from the variety of disciplines this advanced model unifies case management s unique identity Now is the time to define and adopt a competence based model for professional case management COLLABORATE provides this framework This text is presented in four sections Section 1 Historical validation of why this practice paradigm is critical for case management to advance to a profession Section 2 Presentation of the COLLABORATE paradigm with a chapter devoted to each distinct competency and the key elements Section 3 Practical application of the book s content for use by the individual case manager and at the organizational level and The Epilogue Summarizes the COLLABORATE approach in a forward looking context For the reader with limited time reviewing Section 2 provides the substantive meat associated with each of the competencies Our ultimate desire is that the COLLABORATE approach provides an impetus for all stakeholders e g practitioners educational institutions professional organizations to take the necessary steps toward unified practice in order to facilitate the transition of case management considered as a task driven job to its recognition as being a purpose driven profession The book provides a historical validation of why this new practice paradigm is critical for case management to advance as a profession presents the COLLABORATE paradigm with a chapter devoted to each distinct competency and the key elements and covers the practical application of the book s content by individual case managers and at the organizational level Zaccagnini & White's Core Competencies for Advanced Practice Nursing: A Guide for DNP's Diane Schadewald, 2024-01-04 Zaccagnini

White's Core Competencies for Advanced Practice Nursing A Guide for DNPs Fifth Edition continues to be the only textbook intended as the go to resource to help students understand what it means to be a DNP Across the nation Doctorate of Nursing Practice DNP programs can now be found in every state with program growth continuing In April 2021 the AACN released the new Essentials Core Competencies for Professional Nursing practice Although this shifts the Essentials from degree based competencies to practice level based competencies there remains a great need for a dedicated resource that serves as the template for new and existing DNP programs to support faculty and students as they collectively participate in DNP programming teaching and direct care service in multiple roles
