Electrotechnology Practice Jeffery Hampson, Steven Hanssen, 2019-06-07 Electrotechnology Practice is a practical text that accompanies Hampson Hanssen's theoretical Electrical Trade Principles. It covers essential units of competencies in the two key qualifications in the UEE Electrotechnology Training Package Certificate II in Electrotechnology Career Start Certificate III in Electrotechnology Electrician. Aligned with the latest Australian and New Zealand standards, the text references the Wiring Rules AS/NZS 3000:2018 and follows the uniform structure and system of delivery as recommended by the nationally accredited vocational education and training authorities. More than 1000 illustrations convey to the learner various concepts and real world aspects of electrical practices; a range of fully worked examples and review questions support student learning while assessment style worksheets support the volume of assessment. Electrotechnology Practice has strong coverage of the electives for Cert II and Cert III, preparing students to be eligible to sit for the Capstone Assessment or the Licensed Electrician's Assessment (LEA) as a mandatory requirement to earn an Electrician's Licence. Premium online teaching and learning tools are available on the MindTap platform.

Electrical Trade Principles 5th Edition Jeffery Hampson, Steven Hanssen, 2019-02-01 Electrical Trade Principles is a theoretical text that addresses the three key qualifications in the UE11 Electrotechnology Training Package Certificate II in Electrotechnology Career Start Certificate III in Electrotechnology Electrician and Certificate IV in Electrotechnology Systems Electrician. The text helps students progress through the course and satisfactorily complete the Capstone Assessment, making them eligible to apply for an electrician's licence. Control of Machines S. K. Bhattacharya, Brijinder Singh, 2006 Control of Machines is one of the most important functional areas for electrical and mechanical engineers working in industry. In this era of automation and control, every engineer has to acquaint himself with the design, installation and maintenance of control systems. This subject must find its place as a compulsory applied engineering subject in degree and diploma curriculum. Some progressive states and autonomous institutions have already introduced this subject in their curriculum. In this book, static control and programmable controllers have been included, keeping in view the latest developments in modern industry. Relay and static control have been dealt with in details. Most of the control circuits included in this book have been taken from Indian industry. A chapter has been devoted to protection of motors and troubleshooting in control circuits. The chapter on PLC has been made very elaborate to deal with all aspects of logic controllers. Review questions have been included at the end of each chapter. The explanations of circuits and design procedure of control circuits have been made very simple to help students understand easily. Students, teachers and shop floor and design office engineers will find this book a very useful
