Inclusive Cities Kalpana Markandey,B. Srinagesh,2014-01-01 The present study is an effort to delve into the housing market in Hyderabad where a gap between the demand and supply is very obvious It is found that while the houses of the upper and upper middle class continue to boom the middle class is found wobbling for want of housing the lower echelons of the socio economic strata again have some amount of assistance by way of governmental schemes to provide housing The shift from independent

houses to multistoried complexes is also very much evident in Hyderabad over a period of time. The recommendations that flow out from this study are that land meant for housing the underprivileged should be supported and funds at low rates of interest should be provided for construction purpose. Home loan rates should be lowered as also the Income Tax exemption limit on home loan interest repayment. Development of integrated township in the area which can also house information technology firms can be taken up. The development of the township can be undertaken in the private public partnership. The poor can be provided access to safe drinking water and drainage. Also pollution control and personal safety in slums can help the poor. This will cut down the health costs of the less privileged. Inclusiveness in housing can be brought about by providing reasonably priced housing and also by guarding rental housing and ensuring that people are not displaced due to reasons beyond their control. This is apart from providing a well knit society more so that which is assorted from the religious cultural and caste point of view giving a multi cultural touch to the society which will be healthy tolerant and nationalistic.
