How to Ensure Ed/tech is Not Oversold and Underused Arthur D. Sheekey, 2003 Recent claims by researchers and critics suggest that the demand for increasing the number of computers and telecommunications networks to schools and classrooms is coming from the nation's political and business sectors and not from teachers and school practitioners This book was written in response to these claims and suggests that answers to questions about how to successfully integrate and use technology can be found in programs that are currently underway The recommendation to educational policymakers create the conditions that encourage and support teachers to adapt technologies and other tools in ways that respond to the unique needs of their communities school requirements and students learning styles The contributing authors describe the condition of their school or system and each identified the following Goals and objectives Benefits to student learning and engagement Favorable and or unfavorable conditions that influence effectiveness How technology and telecommunications can transform the delivery of education The resources involved and how they are changing the way teachers students and their families are benefiting The conditions necessary Will be of interest among a wide group of stakeholders in the field of education including state and local educational administrators and others involved in adapting and using learning technologies and telecommunications services to improve and extend the quality of K 12 education throughout the nation

Just One Chance Marc Uhlmann, 2017-02-18 William Shaw is your pretty typical seventh grader for the most part He likes movies does pretty well in school although he doesn't care for math and is on the seventh grade football team at Rolling Oaks Middle School William is also on the Autism Spectrum Navigating the world of being an adolescent and middle school student is tough enough but when you see the world like William does things can be a little bit tougher Edward Malone is exactly what you would picture when you think of a high school baseball coach and physical education teacher that's been around for 30 years He's seen and heard just about everything there is during that time but as the Rolling Oaks Middle School Seventh Grade Football Coach Malone will find out that you never really stop learning regardless of how old or how much experience you may possess Read along as William and Coach Malone find their way through the season in their own ways Along the road they will each learn valuable lessons At its core Just One Chance defines William perfectly That's all he wants as a football player but whether he gets it or not will depend on many factors and many people Edward Malone is just one of them
