Teaching Reading and Writing Beyond

High-stakes Testing Rongrong Dong, 2023-03-10 This book tells about an exemplary high school Chinese language arts teacher's effort in nurturing lifelong readers and writers under the test-driven culture in China's society. It looks closely at his everyday literacy practices, focuses on his ways of creating authentic reading and writing spaces for students beyond test preparation. With the lens of social constructivism, the case study reveals his efforts of creating a safe learning environment, modeling his literate life, connecting real life with literacy learning, and building a school-wide literate life for students. Furthermore, he also collaborates with other Chinese language arts faculty and reaches out to school administrators and educators to gain any potential teaching resource for students. The findings indicate exemplary teachers are not only equipped with professional knowledge but also inter-intrapersonal knowledge and practical knowledge in their teaching career, which might be enlightening in today's high-stakes testing culture. The book will appeal to scholars of literacy education and teacher education as well as pre-service and in-service teachers.

Teacher Education in Taiwan Shen-Keng Yang, Jia-Li Huang, 2016-04-14 Since the Teacher Education Act was in place in 1994, student teachers were educated through diverse educational institutions instead of the traditional normal schools, Taiwan's equivalent of teachers colleges. Taiwan maintains teacher education quality by controlling the number of teachers using teacher assessment to eliminate teachers who are not up to standard, evaluating

teacher education institutions evaluating professional development of teachers to raise elementary and secondary teacher quality This book uses Taiwan as a case study to analyze the transformation of teacher education in a country which goes through political economic and societal transitions along the axis of state regulation vs marketization It analyzes the uniqueness of Taiwanese teacher education for international reference and draws implications for teacher education policies in the context of education reform The Formation of Two Approaches to Teacher Education Teacher Education Policy and Policy Direction in Taiwan The Ideology Implications Applications of Teacher Profession Standards The Teacher Education Strategic Alliances in Taiwan This book will interest policy makers researchers and students in the field of education especially in teacher education and comparative education

Rogers,2021 This book moves beyond the purported dichotomy between university based teacher education and alternatives such as Teach For America to consider their common challenges and suggest a starting place from which to imagine a future of more effective teacher preparation In focusing on the experiences of the first Teach For America cohort between 1990 1992 the book anchors its analysis in a particular historical moment allowing a significant accounting of a pivotal time in teacher education as well as thoughtful consideration of both change and continuity in how teachers have been prepared and entered the classroom over the decades since Through its use of oral history testimonies Schooling Teachers offers important stories

about individuals personal experiences and actions but also reveals the broader collective and social forces that shaped and gave meaning to those experiences Richly detailed qualitative data in the form of oral history enables the authors to draw from the specific narratives some general insights that speak to the larger issues of staffing and supporting urban schools

Voices of Social Education Bernardo E. Pohl,Cameron White,Christine Beaudry,2021-02-01 There is only one place where social education can occur and flourish through the voices that create a pedagogy of change And it is these voices where the most exciting and provocative moments can occur for those of us who are passionate about education teaching social justice equity and love As such social education is a journey an endeavor that makes us savor the experience of the journey more than the destination And social education is a journey that is enhanced through educator and student voices because it occurs in the most important spaces of our personal and professional lives It occurs in the hallways of the schools we teach in the staff meetings we attend in the mountain villages we venture to visit in the places we work and in the spaces we occupy Moreover social education is a unique kind of journey because it is a human experience that seldom occurs alone It happens with our colleagues and our loved ones It happens with our students administrators and other professionals who are fighting for the same things that we so fervently believe In the end social education occurs and flourishes in the trenches because it is the active pursuit of getting our hands dirty in our endless pursuit for a better and more just world Social education is also a narrative which takes on a different meaning for each one of us This is because sooner or later each person that embarks into the journey of social education develops its own personal definition of what social education entails through his or her own personal landscape and knowledge This personal landscape has been evolving since we were very young with some of the best examples of human courage and tenacity in the fight for social justice Voices of Social Education A Pedagogy of Change is a collection of personal stories In this volume academics teachers students activists and artists share their personal stories of triumph tribulations and courage in their daily fight for social justice and equality The term social education is not defined as a set number of guidelines or a specific definition we give the term an organic fluency to stress that social education is a point of encounter a common space where we can share with each other our experiences values and culture to form a more genuine and just social experience
