Strom,Robert D. Strom,2014-07-01 Teaching adolescents and learning from them is the paradigm elaborated throughout this second edition of Adolescents in the Internet Age The premise is based upon four assumptions 1 Adolescents have unique experiences that qualify them as the most credible source on what growing up is like in the current environment 2 Adolescents are more competent than many adults with tools of technology that will be needed for learning in the future 3 Adolescents and adults can support mutual development by adopting the concept of reciprocal learning and 4 The common quest of adolescents to gain adult identity could be attained before employment Expectations are the theme for every chapter The reason expectations are so important is because they influence goals determine priorities and are used to evaluate progress and achievements of individuals and institutions When teacher expectations correspond with the abilities and interests of students achievement and satisfaction are common outcomes In contrast if teachers expect too little student potential can be undermined There is also concern if expectations that students have for themselves surpass their abilities This occurs if teachers do not inform students about their deficits Multitasking doing too many things at the same time detracts from productivity Sharing accountability depends upon complimentary and attainable expectations that can be met by students teachers and parents To support appropriate expectations tthis book for secondary teachers and high school students seeking a broader understanding of their own generation is organized in four parts about aspects of learning and development 1 Identity expectations introduce traditional perspectives on adolescence changes related to sources of learning evolving emphasis of schools and ways to support motivation goal setting and formation of identity 2 Cognitive expectations examine mental abilities academic standards emergence of the Internet as a learning tool development of media literacy creative problem solving and encouragement of higher order thinking skills 3 Social expectations explore the need for giving greater attention to social development importance of teamwork skills involvement with social networking adoption of civil behavior school safety and values as a basis for ethical behavior and character 4 Health expectations center on decisions that influence physical health well being and lifestyle choice Consideration is given to stress management emotional intelligence and risk assessment strategies for individual teenagers and the schools that they attend *Modern Methods of School Organization* Prem Lata Sharma,2002

Strom,2013-09-01 Until recently educators were expected to provide all the knowledge students would need to ensure their future However the Internet has altered conditions of learning in ways that motivate students to be more self directed and less dependent on direct instruction Neuroscience discoveries about brain functioning also urge schools to adopt thinking as an aspect of core curriculum Students who acquire thinking skills needed to locate information process and organize data generate creative and practical

ideas communicate with all age groups and collaborate can adapt to technology change and social evolution Encouraging adolescents to choose some goals they pursue respects their need for autonomy Recognizing the need to amend certain goals is important so a person knows when change in personal direction is warranted Exploring careers in a low risk setting motivates realistic aspirations and helps students to shape their future Employer expectations for teamwork require attention Performing well in groups including peer and self evaluation yields productive thinking and is conducive to mental health The intended audience for this book is college students preparing to become teachers in preschool elementary or secondary education The book describes ways schools and families can support higher order thinking during childhood and adolescence Learning that occurs outside school is ignored by tests that reflect only classroom lessons New instruments that measure thinking are needed to enable transformation of school goals and evaluation of student progress Shifting to a dual emphasis on thinking and learning is a challenge for teachers of all grade levels

Learning Throughout Life Robert D. Strom, Paris S. Strom, 2012-12-01 The dangers of age segregation and the benefits of age integration are examined Each generation should be recognized as an essential source for learning Harmony will increasingly depend on general awareness of how other age groups interpret events respect for values that guide their behavior responsiveness to their needs and concerns consideration of their criticisms and solutions and acknowledgement of their contributions This book describes a personality assets and mental abilities to focus learning at each stage of development b obstacles to anticipate and overcome c a rationale to make reciprocal learning common d research findings which identify generational learning needs and e benefits of providing lifelong education Six stages are explored infancy and early childhood birth age 6 middle and later childhood ages 6 10 adolescence ages 10 20 early adulthood ages 20 40 middle adulthood ages 40 60 and older adulthood age 60 Some outcomes of lifelong learning include self control patience integrity resilience persistence problem solving ability acceptance of criticism and generativity The intended audiences for this book are professionals working with individuals and families
