There's one important good reason to use a more advanced Windows Storage Manager feature: Storage Spaces. It enables you to create a virtual "pool" of multiple disks, as separate physical drives are commonly installed. When I have had a lot of trouble installing a new hard drive, the frustrating message "Warning: installing is not recommended" is by no means the friendly system behavior, when given a "Yes" answer. But using the Windows Storage Spaces feature to create a virtual pool of disks after you've installed the system, then adds storage space. Storage Spaces is a great feature, and I'd advise that you install it right away. It's a feature that you should have in the drive pool expansion. You're responsible for the data that you're using at the present. There's no guarantee that the data is safe. It's a good idea to have a backup of the data that you're using.
