Cultures of Expertise in Global Currency Markets Leon Wansleben, 2013-07-18 Notwithstanding financial crises global foreign exchange markets have undergone a tremendous growth during the last two decades Foreign exchange FX is often thought of as a site where economic actors exchange currencies for buying foreign goods or selling goods in foreign countries but the FX markets are better understood as financial spheres dominated by speculative actors A key question is how this huge global speculative sphere has developed and what maintains it Thus far global currency markets have been largely neglected by the new approaches to finance and until now no study has existed to chart the interplay of their structural evolution and their shape as knowledge spheres This new book offers a systematic study of FX markets from a knowledge sociological perspective empirically focussing on analysts within these markets It makes the argument that market structures are reflected in and become stabilised by distinct cultures of financial expertise These cultures connect the actions and perceptions of loosely coupled globally distributed market players and establish shared sets of strategies of how to observe value and invest This highly original book will be of interest to scholars of economics sociology and political science and in particular to all those with an interest in the sociology of finance and the role of finance in the contemporary world

Manual For Training In Research And Innovation Management - Proceedings Of The Second International Course On Research And Innovation Management A Forti, 1994-02-08 Enormous investments in scientific research technology and innovation are made by governments and private industries An important new characteristic of this development is the

increasing scientific sophistication and knowledge content of industrial products and processes Scientific research in universities and independent institutions has moved closer to industry in order to increase efficiency The more society invests its financial and human resources in scientific and technological research the greater will be the demands by society and government for a quick return on its investments This requires more effective management of research and innovation This volume addresses these issues and prepares scientists to successfully tackle the problems connected with the management of modern research activities This is the first manual specially designed for directors of research laboratories leaders of research projects R D managers from private or public sectors and policy makers in the scientific and technological field There is a very strong international demand particularly from developing countries for this type of training Contributions to this manual have been made by international outstanding scientists *Expectations in Economic Theory* S. A. Ozga,2017-07-05 This book deals with economic theory not methodology It does employ certain methodological resolutions These resolutions and the limitations they impose on the nature and the scope of the analysis are reviewed The first resolution concerns what kind of a theory is to be discussed The word theory may mean many things it may mean a hypothesis put forward as an explanation of something an idea or a notion In a normative sense it may mean a recommendation a rule or principle to be followed In science it usually means a system of hypotheses to be accepted as an explanation of certain facts a set of general laws and principles It is also used to distinguish the general principles and methods of a subject from the practice of it The theory with which this volume is concerned is that of science In very general terms it may be defined as a system of hypotheses one following from another which permits the reader to derive from known facts and predictions of other facts If the knowledge of the fact which we predict is important for us in the sense that it permits us to achieve better the objectives we pursue the theory may have a practical value This book is therefore not only a contribution to the analysis of expectations but also an introduction to a number of selected topics in economic theory
