Technical Report, 2004 **Handbook of Prevention Science** Beth Doll, William Pfohl, Jina S. Yoon, 2012-03-07
Prevention research has traditionally focused on preventive interventions tied to specific disorders e.g. substance abuse, conduct disorders, or criminality. This produced silos of isolated knowledge about the prevention of individual disorders but not about interventions that work across disorders. This handbook is the first to comprehensively describe current research and practice in mental health prevention programs that is organized around comprehensive prevention systems that reach across all disorders and all institutions within a community. Throughout the book, preventive interventions are seen as a necessary component of effective mental health programs, not as a replacement for therapeutic interventions. Provided by publisher.

Assessment of Problem Solving Using Simulations Eva Baker, Jan Dickieson, Wallace Wulfeck, Harold F. O'Neil, 2017-09-25. This volume explores the application of computer simulation technology to measurement issues in education, especially as it pertains to problem-based learning. Whereas most assessments related to problem solving are based on expensive and time-consuming measures, i.e., think-aloud protocols or performance assessments that require extensive human rater scoring, this book relies on computerization of the major portion of the administration, scoring, and reporting of problem solving assessments. It is appropriate for researchers, instructors, and graduate students in educational assessment, educational technology, and educational psychology.
