Michigan Teacher, 1873 *Resources in Education*, 2001 **Connecting Abstract Algebra to Secondary Mathematics, for Secondary Mathematics Teachers** Nicholas H. Wasserman, 2018-12-12 Secondary mathematics teachers are frequently required to take a large number of mathematics courses including advanced mathematics courses such as abstract algebra as part of their initial teacher preparation program and or their continuing professional development The content areas of advanced and secondary mathematics are closely connected Yet despite this connection many secondary teachers insist that such advanced mathematics is unrelated to their future professional work in the classroom This edited volume elaborates on some of the connections between abstract algebra and secondary mathematics including why and in what ways they may be important for secondary teachers Notably the volume disseminates research findings about how secondary teachers engage with and make sense of abstract algebra ideas both in general and in relation to their own teaching as well as offers itself as a place to share practical ideas and resources for secondary mathematics teacher preparation and professional development Contributors to the book are scholars who have both experience in the mathematical preparation of secondary teachers especially in relation to abstract algebra as well as those who have engaged in related educational research The volume addresses some of the persistent issues in secondary mathematics teacher education in connection to advanced mathematics courses as well as situates and conceptualizes different ways in which abstract algebra might be influential for teachers of algebra **Connecting Abstract Algebra to Secondary Mathematics for Secondary Mathematics Teachers** is a productive resource for mathematics teacher educators who teach capstone courses or content focused methods courses as well as for abstract algebra instructors interested in making connections to secondary mathematics **Research on Mathematics Textbooks and Teachers' Resources** Lianghuo Fan, Luc Trouche, Chunxia Qi, Sebastian Rezat, Jana Visnovska, 2018-02-13 This book focuses on issues related to mathematics teaching and learning resources including mathematics textbooks teacher guides student learning and assessment materials and online resources The book highlights various theoretical and methodological approaches used to study teaching and learning resources and addresses the areas of resources teachers and students at an international level As for the resources the book examines the role textbooks and other curricular or learning resources play in mathematics teaching learning and assessment It asks questions such as Could we consider different types of textbooks and roles they play in teaching and learning How does the digitalization of information and communication affect these roles What are defining features of e textbooks and how could we characterize the differences between the traditional textbooks and e textbooks As for the teachers the book discusses the relationships between teachers individual and collective resources and the way in which we could model such relationships Specific questions addressed are What is the role of teachers in developing textbooks and other teaching and learning materials What are the relationships between resource designers and users What are the consequences of these changing

roles and relationships for the teaching of mathematics and for teacher knowledge and professional development As for the students the book explores how students as well as their teachers interact through resources It raises and addresses questions such as What are the effects of modern ICT particularly internet on students use and the design of resources How do changing patterns of use and design affect student behaviour learning and relationships to the subject of mathematics
