

Student Exploration: Measuring Motion (ANSWER KEY)

[Download](#)

Student Exploration: Measuring Motion

Vocabulary: distance, speed

Prior Knowledge Questions (Do these BEFORE using the Gizmo.)

The **speed** of an animal is how fast it is moving. A speed of 6 m/s (meters per second) means that the animal moves a **distance** of 6 meters every second.

How would you measure the speed of an animal?

What do you think are the fastest animals?

Gizmo Warm-up

You have been sent on an African safari by *International Geography* magazine. Your assignment is to find the fastest land animals in the world. Your only tool is a video camera.

The safari is shown in the *Measuring Motion* Gizmo™.

On the SAFARI ADVENTURE tab, wait for an animal to pass by. Press the **record** button (⏺). Press **stop** (⏸) when the animal has passed by.

Which animal did you record?

Was the animal walking or running?

Select the PLAYBACK tab. Practice using some of the different buttons on this tab:

Use the **Play** (▶) button to replay the simulation.

Click **Rewind** (◀) to go back to the beginning.

Click **Advance frame** (⏮) to move forward exactly one second at a time.

Click **Tools** at upper left, and drag some **arrows** (↔) onto the recording to mark the positions of the animals at different times.

Use the **Time** slider to go to a specific time.

Activity A:	<u>Get the Gizmo ready:</u>

Strategies for Teaching Science Barbara Houtz, 2011-07-01 This rich resource provides teachers with practical strategies to enhance science instruction Strategies and model lessons are provided for various umbrella topics

Inquire Within Douglas Llewellyn, 2014 Your definitive guide to inquiry and argument based science updated for today s standards Like most teachers are you struggling to make sense of the many recent shifts in science education especially the NGSS Luckily Doug Llewellyn is here to guide you every step along the way His two big aims with this new edition of *Inquire Within* To help you engage students in activities and explorations that draw on their big questions then build students capacity to defend their claims Always striking a balance between the why and the how this third edition models what the new reform efforts looks like in day to day practice New features include how to Teach argumentation a key standards requirement and 21st century career skill Adapt existing science curricula for inquiry based learning to meet today s standards Effectively differentiate scientific instruction for multiple intelligences to drive student achievement Improve students language arts analytic and communication skills through inquiry based instruction Utilize the many inquiry based lesson plans Develop your own inquiry based mindset and grow professionally You ll quickly discover for yourself that this third edition of *Inquire Within* stands on its own as your single best resource for keeping pace with science reform in the classroom Llewellyn s model of teaching and his rich array of practical examples can help every teacher and student to experiences that clearly illustrate what scientists and engineers do This is certainly a guide for the next generation of great teachers Juliana Texley President Elect National Science Teachers Association Llewellyn s *Inquire Within* provides strategies to support our efforts and infuse the components of the Next Generation Science Standards in our instruction through inquiry It should be at the elbow of every teacher interested in understanding inquiry and meeting the challenge Linda Froschauer Past President National Science Teachers Association

Teaching Primary Science Peter

Loxley, Lyn Dawes, Linda Nicholls, Babs Dore, 2014-06-17 Primary Science Promoting positive attitudes to conceptual learning is a full colour core textbook to support and inspire anyone training to teach Science at primary level. This book is a new kind of text linking subject knowledge and pedagogy in one package rather than treating them as separate entities. The text aims to encourage trainee teachers to teach scientific concepts in contexts which will inspire the children to look at the world in new and intriguing ways rather than presenting it as a list of facts and definitions. Encouraging critical reflection and offering practical support, this book will help trainee teachers to overcome negative attitudes to Science. The two-part structure of the book first presents insights into the nature of science and science education, exploring issues such as the value and purpose of teaching Science in the primary school and the value of scientific enquiry. It then moves on to cover subject knowledge relating it to pedagogy. **Teaching Science in Elementary and Middle School Classrooms**

Joseph S. Krajcik, Charlene Lochbihler Czerniak, Carl F. Berger, 2003 This text provides an overview of current science teaching practices for the elementary and middle grades. The authors, top scholars in the field of science education, believe that all children should develop an in-depth and meaningful understanding of scientific concepts and processes. To achieve this, the text utilizes the Project Based Approach. Project-based science stresses that science teaching should emphasize the active engagement of students in science rather than teachers telling students information. Each chapter has several Portfolio Activity boxes that provide active learning experiences or reflections for the student. Like the first edition, the text includes numerous strategies in each chapter that help both new and experienced teachers understand how to teach science in an active and engaging manner. The text also shows teachers how to implement the National Science Education Standards (NSES) and constructivist strategies. A NSES marginal feature keys content to the standards. Moreover, this textbook helps teachers learn how to implement all of today's major reforms, not just read about them. *Physics* Holt Rinehart & Winston, Holt, Rinehart and Winston Staff, 2006 **Innovative Technologies and Learning** Wei-Sheng Wang, Frode Eika Sandnes, Chin-Feng Lai, Teng Aas Sandtrø, Yueh-Min Huang, 2025-08-15 The two-volume set LNCS 15913 and 15914 constitutes the refereed conference proceedings of the 8th International Conference on Innovative Technologies and Learning ICITL 2025 held in Oslo, Norway, during August 5-7, 2025. The 82 papers included in these proceedings were carefully reviewed and selected from 214 submissions. The papers are organized in the following topical sections: Part I: Artificial Intelligence in Education; Computational Thinking in Education; Design and Framework of Learning Systems; VR, AR, MR, XR in Education; Part II: Pedagogies to Innovative Technologies and Learning; STEM/STEAM Education; Application and Design of Generative Artificial Intelligence in Education. *Resources in Education*, 1990 **Prentice Hall Physical Science Concepts in Action Program Planner National Chemistry Physics Earth Science**, 2003-11 Prentice Hall Physical Science Concepts in Action helps students make the important connection between the science they read and what they experience every day. Relevant content, lively explorations, and a wealth of hands-on activities take students' understanding of science beyond the page and

into the world around them Now includes even more technology tools and activities to support differentiated instruction
