Jaws of life: Rescue system

Jaws of Life rescue tools can easily cut through the metal of a car body. They can also be used to bend or open the metal body of a car. Rescue workers must work very carefully to ensure they don't hurt the passengers inside. So, the rescue tools should make small movements, compared to the large movements made by the rescue workers operating them. There are four types of Jaws of Life rescue tools:

- a spreader to pull pieces of metal apart and tear out chunks of metal,
- a cutter to cut metal,
- a combination tool that can cut and spread, and
- a ram, which makes large openings to free people who are trapped.
