Teaching Bibliography, Textual Criticism, and Book History Ann R Hawkins, 2015-10-06 Offers a variety of approaches to incorporating discussions of book history or print culture into graduate and undergraduate classrooms This work considers the book as a literary historical cultural and aesthetic object These essays are of interest to university teachers incorporating textual studies and research methods into their courses **Textual Scholarship and the Material Book** Wim Van

Mierlo, 2007 In the last decades the emphasis in textual scholarship has moved onto creation production process collaboration onto the material manifestations of a work onto multiple rather than single versions onto reception and book history Textual scholarship now includes not only textual editing but any form of scholarship that looks at the materiality of text of writing of reading and of the book The essays in this collection explore many questions about methodology and theory arising from this widening scope of textual scholarship The range of texts discussed from Sanskrit epic via Medieval Latin commentary through English and Scottish Ballads to the plays of Samuel Beckett and the stories of Guimarães Rosa testifies to the vigour of the discipline The range of texts is matched by a range of approach from theoretical discussion of how text happens to analysis of issues of book design and censorship the connections between literary and textual studies exploration of the links between reception and commodification in George Eliot and between information theory and paratext Through this diversity of subject and approach a common theme emerges the need to look further for common ground from which to continue the debate from a comparative perspective Teaching Literary Research Kathleen A. Abbott, William Proctor Williams, 2014-08-01 To a reader of Joyce s Ulysses it makes a difference whether one of Stephen Dedalus s first thoughts is No mother as in the printed version or No mother as in the manuscript The scholarship surrounding such textual differences and why this discipline should concern readers and literary scholars alike is the focus of William Proctor Williams and Craig S Abbott s acclaimed handbook This updated fourth edition outlines the study of texts composition revision physical embodiments process of transmission and manner of reception describes how new technologies such as digital imaging and electronic tagging have changed the way we produce read preserve and research texts discusses why these matters are central to a historical understanding of literature and shows how the insights methods and products of bibliographical and textual studies can be applied to other branches of scholarship *Gender and the Book Trades* Elise Watson, Jessica Farrell-Jobst, 2024-12-02 This volume proposes a new and radically inclusive approach to the study of the book by using gender as a tool of analysis While female authors and women in the book trades have long been studied gender itself has yet to be explored as a methodology rather than a subject in book history We argue that putting gender analysis into practice requires thinking inclusively about both the book world and the interactions of its participants from the beginning With twenty five pioneering case studies that stretch from colonial Peru to modern Delhi using a variety of intersectional methodologies including network analysis critical bibliography and queer theory Gender and the Book Trades sets out an innovative method of analysing the printed book Contributors Rebecca Baumann Montserrat Cachero Ver nica Calsoni Lima Matthew Chambers Kanupriya Dhingra Nora Epstein Natalia

This Companion provides a wide-ranging account of the history of the book and its ways of thinking about works from ancient inscription to contemporary e-books, discussing thematic, chronological and methodological aspects of this interdisciplinary field. The first part considers book cultures from local, national and global perspectives. Part two, organized around the dynamic relationship between the material book and the mutable text, develops a loosely chronological narrative from early writing through manuscript and early printing to the institution of a mechanized book trade and on to the globalization of publishing and the introduction of the electronic book. A third part takes a practical turn, discussing methods, sources and approaches, bibliographical, archival and reading experience methodologies as well as pedagogical strategies.

Women Writers and the Artifacts of Celebrity in the Long Nineteenth Century Maura Ives, Ann R. Hawkins, 2016-12-05 In 1788 the Catalogue of Five Hundred Celebrated Authors of Great Britain, now living, forecast a form of authorship that rested on biographical revelation and media saturation as well as literary achievement. This collection traces the unique experiences of women writers within a celebrity culture that was intimately connected to the expansion of print technology and of visual and material culture in the nineteenth century. The contributors examine a wide range of artifacts, including prefaces, portraits, frontispieces, birthday books, calendars and gossip columns, to consider the nature of women's celebrity and the forces that created it. How did authors like Jane Austen, the Countess of Blessington, Louisa May Alcott, Alice Meynell and Marie Corelli negotiate the increasing demands for public revelation of the private self? How did gender shape the posthumous participation of women writers such as Jane Austen, Ellen Wood, Mary Elizabeth Braddon and Christina Rossetti in celebrity culture? These and other important questions related to the treatment of women in celebrity genres and media and the strategies women writers used to control their public images are taken up in this suggestive exploration of how nineteenth and early twentieth-century women writers achieved popular, critical and commercial success. Ambient Literature Tom Abba, Jonathan Dovey, Kate Pullinger, 2020-11-30 This book considers how a combination of place-based writing and location-responsive technologies produce new kinds of literary experiences. Building on the work done in the Ambient Literature Project 2016-2018, this book argues that these encounters constitute new literary forms in which the authored text lies at the heart of an embodied and mediated experience. The visual, sonic, social and historic resources of place become the elements of a live and emergent *mise en scène*. Specific techniques of narration, including hallucination, memory, history, place-based writing and drama, as well as reworking of traditional storytelling forms, combine with the work of app

and user experience design interaction software authoring and GIS geographical information systems to produce ambient experiences where the user reads a textual and sonic literary space These experiences are temporary ambiguous and unpredictable in their meaning but unlike the theatre the gallery or the cinema they take place in the everyday shared world The book explores the potentiality of a new literary form produced by the exchange between location aware cultural objects writers and readers This book and the work it explores lays the ground for a new poetics of situated writing and reading practices

The Medieval Manuscript Book Michael Johnston, Michael Van Dussen, 2015-08-10 Traditional scholarship on manuscripts has tended to focus on issues concerning their production and has shown comparatively little interest in the cultural contexts of the manuscript book The Medieval Manuscript Book redresses this by focusing on aspects of the medieval book in its cultural situations Written by experts in the study of the handmade book before print this volume combines bibliographical expertise with broader insights into the theory and praxis of manuscript study in areas from bibliography to social context linguistics to location and archaeology to conservation The focus of the contributions ranges widely from authorship to miscellaneity and from vernacularity to digital facsimiles of manuscripts Taken as a whole these essays make the case that to understand the manuscript book it must be analyzed in all its cultural complexity from production to transmission to its continued adaptation

Playing Games in Nineteenth-Century Britain and America Ann R. Hawkins, Erin N. Bistline, Catherine S. Blackwell, Maura Ives, 2021-11-01 A vital part of daily life in the nineteenth century games and play were so familiar and so ubiquitous that their presence over time became almost invisible Technological advances during the century allowed for easier manufacturing and distribution of board games and books about games and the changing economic conditions created a larger market for them as well as more time in which to play them These changing conditions not only made games more profitable but they also increased the influence of games on many facets of culture Playing Games in Nineteenth Century Britain and America focuses on the material and visual culture of both American and British games examining how cultures of play intersect with evolving gender norms economic structures scientific discourses social movements and nationalist sentiments
