Teaching Regrouping In Subtraction Nzmaths:

Regrouping in Subtraction, Grade 2 Workbook Maria Miller, 2016-01-01 In Regrouping in Subtraction Grade 2 Workbook we study regrouping in subtraction starting with two digit numbers First students are taught to break 1 ten into 10 ones For example 5 tens 4 ones is written as 4 tens 14 ones one ten gets broken down into 10 ones This is the process of regrouping one of the tens changes groups from being with the tens to being with the ones After students have mastered that then it is time to use regrouping in subtraction problems and learn the traditional way of subtracting in columns the numbers are written under each other Then we study word problems with more and fewer and also several techniques or tricks for mental subtraction The word problems in the chapter require both addition and subtraction I do not like putting only subtraction word problems in a lesson that is about subtraction Students need to practice recognizing whether a problem requires addition or subtraction thus each set of word problems typically includes both kinds After this it is time to study regrouping in subtraction with three digit numbers There are three cases Regrouping 1 ten as 10 ones such as is needful for 546 229 Regrouping 1 hundred as 10 tens such as is needful for 728 441 Regrouping two times 1 ten as 10 ones and 1 hundred as 10 tens such as is needful for 725 448 Regrouping with zero tens such as is needful for 405 278 Here first we regroup 1 hundred as 10 tens then 1 ten as 10 ones In this workbook we ONLY study cases 1 and 2 from the list above Again students first practice the regrouping process with visual models You could use base ten blocks instead At the end of the workbook students encounter bar graphs again They also play Euclid s game which is meant as a fun supplemental lesson You may omit it if time does not allow

How We Subtract John Charles Stone, 1926 *Teaching Addition, Subtraction, and Place Value* New Zealand. Ministry of Education, Peter Hughes, 2012 Teaching and Learning Subtraction Annie Mae Hawkins, 2016-07-18 This is not busy work or mindless drill and kill. This is not throwing out a bunch of numbers and leaving you to figure it out. This workbook contains REAL WORK which produces REAL LEARNING. We give you the tools necessary to bridge the gap between the abstract concept of regrouping and the concrete result of subtracting two numbers. For a few pennies a page you get reproducible student worksheets a Teacher's Guide with Direct Instructions Answer Keys that demonstrate Step by Step Directions. Pre resource classrooms special education classes ESOL ESL classes home school and adult education. In subtraction you start with a larger number and take some away. To do this manually you either count backwards or start with the smaller number and count up. In many instances this requires several steps. The bigger the number the more steps required. Some students struggle to either fully comprehend or remember the necessary steps for manual subtraction. Just as there are different learning styles there are many different teaching strategies. It is essential to find what works best for your students to maximize their learning potential. This curriculum facilitates higher level thinking active participation and mastery of skills via A Teacher's Guide with Step by Step Direct Instructions the guide provides reading prompts to help the process of teaching subtraction less frustrating for both the teacher and students. The step by step directions encourage active participation which provides opportunity for learning Answer Keys. There are two types of answer keys. The first serves as examples of how the problem should look and the others are in the back of the workbook throughout the teacher's guide.
