Self-Organizing Neural Networks Udo Seiffert,2001-09-25 The Self Organizing Map SOM is one of the most frequently used architectures for unsupervised artificial neural networks Introduced by Teuvo Kohonen in the 1980s SOMs have been developed as a very powerful method for visualization and unsupervised classification tasks by an active and innovative community of interna tional researchers A number of extensions and modifications have been developed during the last two decades The reason is surely not that the original algorithm was imperfect or inad equate It is rather the universal applicability and easy handling of the SOM Com pared to many other network paradigms only a few parameters need to be arranged and thus also for a beginner the network leads to useful and reliable results Never theless there is scope for improvements and sophisticated new developments as this book impressively demonstrates The number of published applications utilizing the SOM appears to be unending As the title of this book indicates the reader will benefit from some of the latest the oretical developments and will become acquainted with a number of challenging real world applications Our aim in producing this book has been to provide an up to date treatment of the field of self organizing neural networks which will be ac cessible to researchers practitioners and graduated students from diverse disciplines in academics and industry We are very grateful to the father of the SOMs Professor Teuvo Kohonen for sup porting this book and
