The SAGE Sourcebook of Advanced Data Analysis Methods for

Communication Research Andrew F. Hayes, Michael D. Slater, Leslie B. Snyder, 2008 A must have volume for every

communication researcher's library The SAGE Sourcebook of Advanced Data Analysis Methods for Communication Research provides an introductory treatment of various advanced statistical methods applied to research in the field of communication. Written by authors who use these methods in their own research, each chapter gives a non-technical overview of what the method is and how it can be used to answer communication-related questions or aid the researcher dealing with difficult data problems. Students and faculty interested in diving into a new statistical topic such as latent growth modeling, multilevel modeling, propensity scoring, or time series analysis will find each chapter an excellent springboard for acquiring the background needed to jump into more advanced technical readings.

The Illustrated Guide to the Content Analysis Research Project Patricia Swann, 2020-06-07 The Illustrated Guide to the Content Analysis Research Project makes mass media research more accessible through an informal and humorous student-centered approach. Author Patricia Swann provides a colorful step-by-step guide to developing a typical mass media research project using the content analysis method. The fundamental elements of this research method are presented in plainspoken language perfect for undergraduates and new researchers, complete with engaging illustrations and an informal narrative that tackle students' most common sticking points when learning and applying research methods. Supplemented by online worksheets for further reflection, this book is an excellent companion to research-centered courses in mass media, communication studies, marketing, and public relations at the introductory level.

A Handbook of Media and Communication Research Klaus Bruhn Jensen, 2020-12-29 Thoroughly revised and updated, this third edition integrates perspectives from the social sciences and the humanities, focusing on methodology as a strategic level of analysis that joins practical applications with theoretical issues. The Handbook comprises three main elements: historical accounts of the development of key concepts and research traditions; systematic reviews of media organizations, discourses, and users, as well as of the wider social and cultural contexts of communication; and practical guidelines with sample studies taking readers through the different stages of a research process and reflecting on the social uses and consequences of research. Updates to this edition include an overview of the interrelations between networked mass and interpersonal communication; a new chapter on digital methods; three chapters illustrating different varieties of media and communication research, including industry-academic collaboration and participatory action research; presentation and discussion of public issues such as surveillance and the reconfiguration of local and global media institutions. This book is an invaluable reference work for students and researchers in the fields of media, communication, and cultural studies.
