Researcher Bonnie Gaunt continues her search on Gematria and Bible codes In this book Gaunt makes a new discovery of the numeric patterns in the Gematria of the Bible and their relationship to the 3 4 5 triangle the earth moon and sun presents an exquisite display of evidence of the magnificent Author of Creation and His time line for the blessing of man Using the Number Code it is found that the parable of the Good Samaritan is in fact a time prophecy telling the time of Jesus return His

miracles of healing and of turning water into wine have been encoded with evidence of the time and the work of the beginning of the great Third Day The Number Code takes us on a journey from Bethlehem to Golgotha and into the Kingdom of Jesus Christ the Kingdom of God and the building of the New Jerusalem Genesis One Bonnie Gaunt,2003 This new book on the Bible Code reveals the exciting new discoveries of the Bibles hidden numbers that will transport you from our foundations in creation into the magnificent future that has been planned for man on planet earth The amazing relationship of the Book of Revelation to the first chapter of Genesis reveals a magnificent plan that was ordered from the beginning and has progressed precisely on schedule through a circle of seven thousand years The future of man has its roots in Genesis One Discover the awesome relationship of the very special numbers 3 and 7 discover the curious relationship between the Book of Revelations and Genesis learn how the secret code of Gematria is built into the Bible Chapters include Science Physics and the Bible The Formula for Creation Spreading out the Earth Truth is Eternal Go in a Circle John and Circle of Time John Completes the Circle The Divine Utterances The Last Adam The Miracles of Growth Birthing the Universe **Linking Architecture and Education** Anne Taylor,2009-05-16 For the past forty years Anne Taylor has studied how schools classrooms playgrounds homes museums and parks affect children and how they learn As a result she has developed a holistic sustainable philosophy of learning environment design She argues persuasively that architects must integrate their design knowledge with an understanding of the developmental needs of learners while at the same time educators parents and students must broaden their awareness of the built natural and cultural environment to maximize the learning experience In other words schools and other environments can themselves become three dimensional textbooks When architects are cognizant of newer models of education and educators view the environment as more than a box in which to teach prescribed lessons the result is an informed architecture that enables children to discover the power of their own learning The book presents numerous examples of dynamic designs that are the result of interdisciplinary understanding of place Taylor includes designer perspectives forums derived from commentary by outside contributors involved in school planning and a wealth of photographs of thoughtful and effective solutions to create learning environments from comprehensive design criteria Because the concept of school is enlarged to a community campus the book also spawns a new model of teaching and learning This book is essential reading for educators architects and community members who are anxious to transform education in America and elsewhere Anne Taylor is the most outstanding educator leading proponent and practitioner in the three dimensional textbook field Her work is the finest resource available for connecting students young and old to their learning environments and visa versa Edward E Kirkbride NCARB REFP Before Western man divided the universe into discrete subject matter areas the order in the universe was and still is both interdisciplinary and holistic The branching of trees spiraling of shells meandering of streams and the radial designs of flowers for example represent an analogy of mathematics biology and art The current artificial separation of subject matter is in contrast to the way the world

is constructed and the way children perceive it Architecture and the study of the built natural and cultural environment synthesize the world of material things and the world of ideas Further more it helps us to realize that we are a part of not apart from the environment This book is a tool and a gift to designers educators and students everywhere to assist them in seeing the meaning behind all that we view and use for living on earth To know our precious relationship to our surroundings is the intent of this book In this way life is a work of art and each of us is an artist Anne Taylor **Resonance Alchemy**
