*The Sea and Nineteenth-Century Anglophone Literary Culture* Steve Mentz, Martha Elena Rojas, 2016-11-18 During the nineteenth century British and American naval supremacy spanned the globe The importance of transoceanic shipping and trade to the European based empire and her rapidly expanding former colony ensured that the ocean became increasingly important to popular literary culture in both nations This collection of ten essays by expert scholars in transatlantic British and American literatures interrogates the diverse meanings the ocean assumed for writers readers and thinkers on both sides of the Atlantic during this period of global exploration and colonial consolidation The book s introduction offers three critical lenses through which to read nineteenth century Anglophone maritime literature wet globalization which returns the ocean to our discourses of the global salt aesthetics which considers how the sea influences artistic culture and aesthetic theory and blue ecocriticism

which poses an oceanic challenge to the narrowly terrestrial nature of green ecological criticism The essays employ all three of these lenses to demonstrate the importance of the ocean for the changing shapes of nineteenth century Anglophone culture and literature Examining texts from Moby Dick to the coral flower books of Victorian Australia and from Wordsworth's sea poetry to the Arctic journals of Charles Francis Hall this book shows how important and how varied in meaning the ocean was to nineteenth century Anglophone readers Scholars of nineteenth century globalization the history of aesthetics and the ecological importance of the ocean will find important scholarship in this volume
