referenced this work features hilarious entries **Information and Creation** German Golitsyn, Vladimir Petrov, 2012-12-06 This book is devoted to one of the central problems of contemporary thinking for which C. P. Snow in 1959 coined the phrase of the Two Cultures. In this concept human endeavour is directed on one side to the forward looking sciences: mathematics, physics, chemistry, biology etc. and on the other side to the backward looking humanities including psychology, linguistics, sociology etc. In this dichotomy Snow saw no possibility of unification. On the other hand the urge towards self-consistency and harmony in the mental and spiritual lives of both man and society as a whole is clearly one of the major forces of creativity, both scientific and artistic. This force aims at the unification of the Two Cultures in order to build an integrated self-consistent system for our intellectual life. Some attempts in this direction have been made before and will be described in this book. It is our aim to contribute to the achievement of an integrated mental life on the basis of information theory. In order to construct our model we examine the laws of information theory leading us to the deduction of the main laws inherent in both cultures. Thus we consider the evolution of both non-living and living matter, human behaviour, the phenomenon of language, the sphere of aesthetics etc. We hope that our work will be useful both for researchers who are trying to derive different integral theories and for various other consumers of scientific knowledge, meaning broad circles of intellectuals. *The Perfectly Useless Book of Useless Information* Don Voorhees, 2010 A compendium of frivolous facts, silly statistics and useless trivia including information on the filming of Star Wars and strange warning labels necessitated by litigation. *The Best Book of Useless Information Ever* Noel Botham, 2007-12-18 From the creators of the 1 New York Times bestseller *The Book of Useless Information* comes another enlightening, entertaining and ultimately useless assortment of trivia. If you find yourself transfixed by the most trivial of trivia or mesmerized by the most minor of minutiae, *The Useless Information Society's* latest findings can satisfy your every need. This wide-ranging collection will fill every nook and cranny of your brain with information you'll surely never need but will enjoy learning anyway. Did you know that penguins can jump six feet out of the water, that everyone is color blind at birth, Would you care to know what the first meal eaten on the moon was, what country drinks the most Coca-Cola? Hint: It's not the United States. In 1995 a secret society was formed comprising Britain's foremost thinkers, writers and artists to trade and share in useless information or, as founding member Keith Waterhouse, playwright and journalist would have it, totally bloody useless. **The Ethics of Information Technology and Business** Richard T. De George, 2008-04-15 This is the first study of business ethics to take into consideration the plethora of issues raised by the Information Age. The first study of business ethics to take into consideration the plethora of issues raised by the Information Age. Explores a wide range of topics including marketing, privacy and the protection of personal information, employees and communication, privacy, intellectual property issues, the ethical issues of e-business, Internet-related business ethics problems and the ethical dimension of information technology on society. Uncovers previously ignored ethical issues. Underlines the need for public discussion of the issues. Argues that computers and information technology have not necessarily developed in the
