Media Capitalism Thomas Klikauer, 2022-01-01 This book argues that media and capitalism no longer exist as separated entities and posits three reasons why one can no longer exist without the other Firstly mass media have become indispensable to capitalism due to the media's ability to sell the commodities of mass consumerism Media capitalism also creates pro capital attitudes among a target population and establishes an ideological hegemony Thirdly media capitalism provides mass deception to hide the pathologies of capitalism which include mass poverty rising inequalities and the acceleration of global warming To illuminate this the book's historical chapter traces the emergence of media capitalism Its subsequent chapters show how media capitalism has infiltrated the public sphere society schools universities the world of work and finally democracy The book concludes by outlining how societies can transition from media capitalism to a post media capitalist society

Liturgy's Imagined Past/s Teresa Berger, Bryan D. Spinks, 2016-05-03 This book calls attention to the importance of scholarly reflection on the writing of liturgical history The essays not only probe the impact of important shifts in historiography but also present new scholarship that promises to reconfigure some of the established images of liturgy s past Based on papers presented at the 2014 Yale Institute of Sacred Music Liturgy Conference Liturgy s Imagined Past s seeks to invigorate discussion of methodologies and materials in contemporary writings on liturgy s pasts and to resource such writing at a point in time when formidable questions are being posed about the way in which historians construct the object of their inquiry The Geography of Names Gwilym Lucas Eades, 2016-07-15 This book examines geographical names place names and toponymy from philosophical and cultural evolutionary perspectives Geographical name tracking networks Geo NTNs are posited as tools for tracking names through time and across space and for making sense of how names evolve both temporally and spatially Examples from North and South American indigenous groups the Canadian arctic Wales England and the Middle East are brought into a theoretical framework for making sense of aspects of place naming practices beliefs and systems New geographical tools such as geographic information systems GIS and global positioning systems GPS are demonstrated to be important in the production and maintenance of robust networks for keeping names and their associated meanings viable in a rapidly changing world where place naming is being taken up increasingly in social media and other new mapping platforms The Geography of Names makes the case that geographical names are transmitted memetically i e as cultural units or memes through what Saul Kripke called communication chains Combining insights from Kripke with views of later Wittgenstein on language and names as being inherently spatial the present work advances theories of both these thinkers into an explicitly geographical inquiry that advances philosophical and practical aspects of naming language and mapping **Society and Education** Stavros Moutsios, 2017-07-20 Society and Education explores the relation of society to

education in Europe as well as its comparative perspective towards overseas societies and their institutions It is an enquiry into the social historical institution of education and cross cultural studies in Europe Elaborating on the Castoriadian ontology the book delves into the magma of social imaginary significations that characterise and associate pivotal epochs of the continent's history Classical Greece and Modernity and exemplifies their incarnation in educational systems and in the formation of the European and in general the Western comparative gaze With a particular focus on our epoch Postmodernity and globalisation the study traces the pervasive dominance of capitalist significations in social institutions forms and activities as well as in education and the way it is compared across countries Nevertheless as Moutsios suggests the European tradition notwithstanding its ideological usage by much of social sciences contains an indissoluble critical and self reflective dimension which needs to be sustained and advanced in education and its cross cultural comparison perhaps more than ever before The book demonstrates the embeddedness of education in its cultural context and should therefore be of great interest to academics researchers and postgraduate students who are involved with comparative education the sociology and history of education education policy and European studies
