Ontology and Providence in Creation Mark Ian Thomas Robson,2011-11-03 Ontology and Providence in Creation critically examines a particular Leibnizean inspired understanding of God s creation of the world and proposes that a different understanding should be adopted The Leibnizean argument proposes that God s understanding encompassed a host of possible worlds only one of which he actualized This proposition is the current orthodoxy when philosopher and theologians talk about the philosophical understanding of creation Mark Robson argues that this commits the Leibnizean to the notion that possibility is determinate He proposes that this understanding of creation does not do justice to the doctrine that God created the world out of nothing Instead of possible worlds Robson argues that we should understand possibility as indeterminate There are no things in possibility hence God created out of nothing He examines how this conception of possibility is held by C S Peirce and how it was developed by Charles Hartshorne Robson contends that not only does the indeterminate understanding of possibility take seriously the nothing of ex nihilo but that it also offers a new solution to the problem of evil

Like Sex with Gods Bayla Singer,2003 Human flight is not a simple matter of science and technology It is a continuing epic of

dreams and obsession of yearning and striving to harness the intellect in the service of the emotions In *Like Sex with Gods An Unorthodox History of Flight* Bayla Singer offers a unique approach to humanity's fascination with flying Rather than merely tracing the factual prehistory of flight up to the success of the Wright Brothers Bayla Singer considers the interaction and influence of our dreams fantasies culture and technology on the age old quest to fly This enlightening study begins with the deities and other denizens of the heavens that humanity has created in its religion literature and art At first a monopoly of the gods flight came to interest humanity as a way to free itself from the physical and intellectual bonds of the earth The myth of flight eventually gives way to the pursuit of actual flight Singer shows in compelling detail the many flying machines that have been created including balloons gliders and kites The accomplishment of the Wright Brothers and our successful trips into space are merely stops on a continuing journey as our ancient dream of flight continues to push us to new and loftier places Filled with compelling stories and detailed illustrations this book provides absorbing reading for aviation experts those fascinated with the intimate relationship between technology and culture and all of us who have even a passing interest in flying
