

Installing in your car

Use the supplied mount to install your TomTom Rider in your vehicle. Read the instructions about positioning your device before you install your Rider.

To install your Rider, do the following:

1. Connect the supplied USB cable to the mount. If the mount is integrated into your Rider, connect the USB cable to the device.

Note: Use ONLY the USB cable supplied with your Rider. Other USB cables may not work.

2. Connect the USB cable to the USB car charger and plug this into the power supply on your dashboard.
3. Choose the best smooth location, on your windscreen or side window, to mount your TomTom Rider.

Tip: If the mount is integrated into your Rider, you can easily change the rotation of your device. Push the button on the back of the device to release the mount, then slide the mount out. Insert it back into the other side of the device.

4. Make sure that both the suction cup on the mount and your windscreen are clean and dry.
5. Press the suction cup of the mount firmly against your windscreen.
6. Turn the rubber grip near the base of the mount in a clockwise direction until you feel it lock.
7. If your mount is not integrated into your Rider, place your Rider in the mount, making sure that it clicks into place.

Dashboard mount disks are available as part of a range of accessories for your Rider. For more information, go to tomtom.com/accessories.

Positioning the device

Be careful where you install your Rider in your car. The Rider shouldn't block or interfere with any of the following:

- Your view of the road.
- The controls in your car.
- Your rear-view mirrors.
- The airbags.

You should be able to reach your Rider easily without leaning or stretching. You can attach your Rider to the windscreen or side window or you can use a Dashboard Mount Disk to attach the mount to your dashboard.

Switching on and off

Switching your device on

Press the On/Off button until your device starts. If the device was off you see the map view. If your device was sleeping you see the last screen you were looking at.

Sending your device to sleep

To send your navigation device to sleep, press the On/Off button and then release it.
