research has revealed testosterone replacement therapy with Low T drugs is not a good option because of the increased risk of cardiovascular problems such as heart attack and stroke and because the body can become dependent on pharmaceutical testosterone and stop producing any on its own In this updated edition of The Natural Testosterone Plan Stephen Harrod Buhner shows why men need help to maintain their testosterone levels as they age and explains how naturally occurring phytoandrogens plant medicines that contain male hormones can safely remedy the depletion exerted by the environment Buhner details how each phytoandrogen works when its use is indicated and the most appropriate method of application providing all men with safe natural and effective means of maintaining optimum testosterone levels well into old age
