Conclusion *The Infinite Elevator* Hugo Bainbridge, Tom our protagonist is the quintessential everyman He commutes He pays bills He dreams of winning the lottery but only if he doesn't have to work for it His life in short is as unremarkable as a beige wall Until that is he steps into an elevator that decides to redefine the meaning of vertical transport This isn't just any elevator it's an elevator that doesn't believe in limits spatial temporal or otherwise It's a vertical Rorschach test projecting the reader's own anxieties and probably a few singing vegetables onto the canvas of reality Each floor presents a new and increasingly absurd scenario one minute he's dodging opera singing onions the next he's attempting a horizontal waltz on a gravity reversed planet while engaging in a profound philosophical debate with a squirrel who claims to be the reincarnation of Socrates The humor is derived from the contrast between the utterly impossible situations and Tom's consistently relatable reactions His bewilderment his attempts to maintain some semblance of order his increasingly desperate searches for an exit or even a decent cup of coffee This is a journey into the absurd a celebration of the unexpected and a gently mocking investigation into the very nature of existence all packaged within a surprisingly fast paced and hilarious narrative So settle in reader You're in for a wild ride Just remember to leave your expectations at the door you'll need the space

The Core Six Harvey F. Silver, R. Thomas Dewing, Matthew J. Perini, 2012 Drawing on their extensive research and practice in schools across the United States the authors of this indispensable guide offer six research based classroom proven strategies that every K-12 teacher needs to respond to the Common Core State Standards This practical book includes sample lesson plans and checklists to ensure effective implementation of each strategy in the classroom

Teaching for Deeper Learning Jay McTighe, Harvey F. Silver, 2020-01-22 Far too often our students attain only a superficial level of knowledge that fails to prepare them for deeper challenges in school and beyond In *Teaching for Deeper Learning* renowned educators and best selling authors Jay McTighe and Harvey F. Silver propose a solution teaching students to make meaning for themselves Contending that the ability to earn understanding will equip students to thrive in school at work and in life the authors highlight seven higher order thinking skills that facilitate students acquisition of information for greater retention retrieval and transfer These skills which cut across content areas and grade levels and are deeply embedded in current academic standards separate high achievers from their low performing peers Drawing on their deep well of research and experience the authors Explore what kind of content is worth having students make meaning about Provide practical tools and strategies to help teachers target each of the seven thinking skills in the classroom Explain how teachers can incorporate the thinking skills and tools into lesson and unit design Show how teachers can build students capacity to use the strategies independently If our goal is to prepare students to meet the rigorous demands of school college

and career then we must foster their ability to respond to such challenges This comprehensive practical guide will enable teachers to engage students in the kind of learning that yields enduring understanding and valuable skills that they can use throughout their lives
