The Belief Book:

The Belief Book David G. McAfee, 2015 What is belief and why is it so important Where did it come from and what does it do This book answers all of those questions and more David G McAfee an author who studies religions teamed up with writer and illustrator Chuck Harrison to create The Belief Book No matter how old or how young you are this easy to read book can help you learn more about religions and gods and beliefs in general It will also teach you about something called The Scientific Method which is how we learn new things about the world By the time you re done reading you will know the answers to some of life s biggest questions but more importantly you will see why your questions and all questions for that matter are so important This book is the first in a series of books all about belief gods and religion The fully illustrated and interactive Belief Book is for readers and thinkers of all ages including kids and kids at heart *The Belief System Nut* James Bruce, 2014-12-07 A belief system is like the nut inside of a walnut The protective shell of the walnut is like the several influences that affect and guard one s beliefs This self examination book is guaranteed to inform the active participant of how their beliefs are created and sustained They will be amazed as their belief system nut begins to open They will enjoy the experience of discovering themselves as they critique and rethink their belief systems flaws Do I what I believe Do I believe what I know And Why do I believe what I believe What does that say about me And where will my beliefs take me The Images of Time Robin Le Poidevin, 2007-09-27 The Images of Time presents a philosophical investigation of the nature of time and the mind s ways of representing it Robin Le Poidevin examines how we perceive time and change the means by which memory links us with the past the attempt to represent change and movement in art and the nature of fictional time These apparently disparate questions all concern the ways in which we represent aspects of time in thought experience art and fiction They also raise fundamental problems for our philosophical understanding both of mental representation and of the nature of time itself Le Poidevin brings together issues in philosophy psychology aesthetics and literary theory in examining the mechanisms underlying our representation of time in various media and brings these to bear on metaphysical debates over the real nature of time These debates concern which aspects of time are genuinely part of time s intrinsic nature and which in some sense are mind dependent Arguably the most important debate concerns time s passage does time pass in reality or is the division of events into past present and future simply a reflection of our temporal perspective a result of the interaction between a static world and minds capable of representing it Le Poidevin argues that contrary to what perception and memory lead us to suppose time does not really pass and this surprising conclusion can be reconciled with the characteristic features of temporal experience **Belief's Own Ethics** Jonathan E. Adler, 2006-01-20 The fundamental question of the ethics of belief is What ought one to believe According to the traditional view of evidentialism the strength of one s beliefs should be proportionate to the evidence Conventional ways of defending and challenging evidentialism rely on the idea that what one ought to believe is a matter of what it is rational prudent ethical or personally fulfilling to believe

Common to all these approaches is that they look outside of belief itself to determine what one ought to believe. In this book Jonathan Adler offers a strengthened version of evidentialism arguing that the ethics of belief should be rooted in the concept of belief that evidentialism is belief's own ethics. A key observation is that it is not merely that one ought not but that one cannot believe, for example, that the number of stars is even. The cannot represents a conceptual barrier, not just an inability. Therefore, belief in defiance of one's evidence or evidentialism is impossible. Adler addresses such questions as: irrational beliefs, reasonableness, control over beliefs, and whether justifying beliefs requires a foundation. Although he treats the ethics of belief as a central topic in epistemology, his ideas also bear on rationality, argument, and pragmatics, philosophy of religion, ethics, and social cognitive psychology.

Transparent Minds Jordi Fernández, 2013-02-07 How do we know our current states of mind, what we want, and believe in? Jordi Fernández proposes a new theory of self-knowledge, challenging the traditional view that it is a matter of introspection. He argues that we know what we believe and desire by looking outward towards the states of affairs which those beliefs and desires are about.

Beyond the Brain Duoyi Fei, 2023-02-18 Different from traditional research on the mind-body problem, often discussed from an epistemological viewpoint which assumes that mental processes are internal to the person, this book demonstrates the crucial role of contextual relevance in the workings of the mind and illustrates how mind emerges from the individual's interactions with her physical, social, and cultural environments. It also develops the interpersonal and social aspects of embodied mind. The body that creates meaning is not only an emotional, kinesthetic, and aesthetically experiencing body; the body that creates meaning is a social body. It suggests that mind-body relations are not only achieved through the interaction between our own mind and body but by other minds in our intersubjective interactions. It is related to epistemology, metaphysics, ethics, value theory, action theory, and the philosophies of mind, science, logic, and technology. The readership may include graduate and undergraduate students studying philosophy, law, political science, sociology, psychology, etc., educators, researchers, scholars, and anyone who shows an interest in philosophy.

The Quest for Truth F. Leroy Forlines, 2001 This invaluable tool seriously discusses profound truths that apply to every facet of life. Biblical truth should be made applicable to the total personality. The inescapable questions of life are answered from the standard of God's authoritative Word.

The Current State of the Coherence Theory J. Bender, 2012-12-06 The subtitle of this book should be read as a qualification as much as an elaboration of the title If the goal were completeness then this book would have included essays on the work of other philosophers such as Wilfrid Sellars Nicholas Rescher Donald Davidson Gilbert Harman and Michael Williams Although it would be incorrect to say that each of these writers has set forth a version of the coherence theory of justification and knowledge it is clear that their work is directly relevant and reaction to it could easily fill a companion volume This book concentrates however on the theories of Keith Lehrer and Laurence Bonjour and I doubt that any epistemologist would deny that they are presently the two leading proponents of coherentism A sure indication of this was the ease with which the papers in this volume were solicited and delivered The many authors represented here were willing prepared and excited to join in the discussion of Bonjour's and Lehrer's recent writings I thank each one personally for agreeing so freely to contribute All of the essays but two are published for the first time here Marshall Swain's and Alvin Goldman's papers were originally presented at a symposium on Bonjour's The Structure of Empirical Knowledge at the annual meeting of the Central Division of the American Philosophical Association Chicago Illinois in April 1987
