Maris,F.C.L.M. Jacobs,2011-09-08 The central question in legal philosophy is the relationship between law and morality The legal systems of many countries around the world have been influenced by the principles of the Enlightenment freedom equality and fraternity The position is similar in relation to the accompanying state ideal of the democratic constitutional state as well as the notion of a welfare state The foundation of these principles lies in the ideal of individual autonomy The law must in this view guarantee a social order which secures the equal freedom of all This freedom is moreover fundamental because in modern pluralistic societies a great diversity of views exist concerning the appropriate way of life This freedom ideal is however also strongly contested In *Law Order and Freedom* a historical overview is given pertaining to the question of the extent to which the modern Enlightenment values can serve as the universal foundation of law and society     *Global Commerce in the Age of Enlightenment* J. Bohorquez,2022-12-30 Combining contextual institutional and global perspectives this book evaluates the impact of international trade on eighteenth century economic thought It meticulously delineates how economic ideas and institutions flowed between North and South Europe and across the Indian and Atlantic Oceans during the Age of Enlightenment *Global Commerce in the Age of Enlightenment* carefully explores contemporary debates about economic institutions which were a crucial element in the race for controlling international trade Eighteenth century thinkers devoted much attention to the relative merits of existing institutions such as free ports grasped the dangers of economic dependence and appraised emerging conceptions of property rights The author draws on an impressive range of sources including pamphlets and travel accounts and work from lesser known figures such as Pierre Poivre and Ange Goudar This volume will be valuable reading for advanced students and researchers of the history of economic thought economic history political economy the history of ideas and global history     **Yeast** Charles Kingsley,1893
