The Bible Gerald Charles Tilley, 2017-07-16 This is a general introduction to the Bible that presents these writings as revelation from God to all humanity This perspective is based upon the reality that textual criticism and archaeological excavations confirm that the Biblical text and history is reliable This perspective is also based upon the evidence that the Bible cannot be adequately explained as a product of the cultures and eras in which the various documents were written For example the Biblical writers avoid the mythologies and misperceptions that were believed by the surrounding nations at the time of the various writings In addition there are scientifically accurate statements in some of these documents that were undiscovered until modern science An honest reader cannot easily dismiss such evidence of divine authorship This Bible Introduction explains key theological term related to the Bible such as Inspiration Revelation Inerrancy and Authority This book also indicates the flaws in the Documentary Hypothesis which is taught in secular and Liberal institutions despite having absolutely no evidence to support it It also shows why the apocryphal and Gnostic writings were not included in the Bible
