witnesses across the continent describing identical communication methods they couldn't possibly have coordinated. The answers lie buried in Short's unprecedented database of encounters but they're not the answers you expect. Questions That Will Haunt You: What does it mean when these creatures demonstrate knowledge that should be impossible for any undiscovered animal? Why do Native American accounts from centuries ago perfectly match modern witness reports? How do you explain documented cases of what appears to be revenge? What are the implications of the strategic behaviors Short uncovers? The Evidence You've Never Heard: Hidden within these pages are case studies that will make you question everything. The railroad engineer's 1950 encounter that reads like science fiction but comes with documentation. Strategic behaviors that suggest military level intelligence. Communication abilities that blur the line between animal and something else. Family dynamics that mirror our own in terrifying ways. A Warning to Readers: This isn't entertainment. Short's methodology is rigorous, her skepticism legendary, and her conclusions unsettling. She presents only what can be documented, cross-referenced, and verified. The patterns she uncovers suggest we may be dealing with something far more complex than a missing link. For Those Who Dare to Know: If you've ever felt watched in the wilderness, if you've heard sounds that didn't belong, if you've wondered what's really out there in North America's vast remote areas, this book contains answers. But once you know what Short discovered, you'll never look at a tree line the same way again. Some mysteries are better left unsolved. This isn't one of them. Based on the largest behavioral database ever compiled, featuring witness accounts that span decades and defy conventional explanation, what emerges from the data will challenge everything you thought you knew about what shares our continent. Are you prepared for what three decades of serious research reveals? Read at your own risk. **Once in a Blue Moon** R. S. The difficulty is Chris and Lulu don't love each other. The trouble starts when the day before the wedding, Amanda James, the human girl Chris really does love, comes back to town. This at a time when Chris is under fire from Jack Newday, a non-ranger rabble rouser who believes Chris to be Bigfoot, a misnomer that has followed rangers like Chris for over a thousand years.
