lizards with the intense black eyes have suffered the fate of goldfish as they've been marketed by pet shops as cheap easy care insect eating reptiles. In order to keep green anoles thriving in their vivaria, pet owners must approach their husbandry with care and respect. Philippe de Vosjoli's *Green Anoles* provides the precise information necessary to reach that goal. The book begins with a chapter about the characteristics and behavior, natural history and anatomy of green anoles, all of which is critical information for a keeper to better understand the needs of his or her pet. As pets, green anoles are best kept in their vivaria and not handled, so the setup of a beautifully landscaped vivarium with proper lighting, heat, humidity, ventilation and substrate is key. This *Advanced Vivarium Systems* title offers complete information about housing, feeding and nutrition, diseases and disorders and breeding, as well as how to set up naturalistic vivaria for one or more anoles or a community of anoles and compatible species. The chapter on other anoles recommends some very attractive species for the beginning lizard keeper to expand his anole family, such as the brown anole, big-headed anole, Cuban or knight anole and Jamaican anole. The finale chapter on compatible species includes descriptions and photographs of a half dozen interesting options, such as the flying gecko, pigmy skink and green tree frog. Resources and index included.
