Laffer,Jeanne Cairns Sinuefield,Brian Domitrovic,2022-09-27 The definitive history of the effect of the income tax on the economy Ever since 1913 when the United States first imposed the income tax via constitutional amendment the top rate of that tax has determined the fate of the American economy When the top rate has been high as in the late 1910s the 1930s 1940s 1950s and 1970s the response of those with money and capital has been to curtail real economic activity in favor of protecting assets and income streams Huge declines have come to the economy in these circumstances The most brutal example was the Great Depression itself When the top tax rate has been cut and held at reduced levels as in the 1920s the 1960s in the long boom of the 1980s and 1990s and briefly in the late 2010s astonishing reversals have occurred The rich have brought their money out of hiding and put it to work in the economy The huge swings in the American economy since 1913 have had an inverse relationship to income tax rates     A Republic of Equals Jonathan Rothwell,2021-09-14 In this provocative book economist Jonathan Rothwell draws on the latest empirical evidence from across the social sciences to demonstrate how rich democracies have allowed racial politics and the interests of those at the top to subordinate justice He looks at the rise of nationalism in Europe and the United States revealing how this trend overlaps with racial prejudice and is related to mounting frustration with a political status quo that thrives on income inequality and inefficient markets But economic differences are by no means inevitable Differences in group status by race

and ethnicity are dynamic and have reversed themselves across continents and within countries Inequalities persist between races in the United States because Black Americans are denied equal access to markets and public services Meanwhile elite professional associations carve out privileged market status for their members leading to compensation in excess of their skills
