registered goods with geographical indications linked with their place of origin. It argues that the origin of these goods is attributed to a distinctive ecology that brews in a particular place. The attributes of their origin further endorse their unique geographical indications through legal channels. Drawing from a variety of disciplines including geography, history, sociology, handicrafts, paintings, and textiles, the author also examines the Geographical Indications Act of 1999 and shows how it has created a scope to identify, register, and protect those goods, be they natural, agricultural, or manufactured. The work presents a new perspective on the indigenous diversities and offers an original understanding of the geography and history of India. Lucid and accessible, with several illustrative maps, this book will be useful to scholars and researchers in the social sciences, environmental studies, development studies, law, trade, and history.
