of hybrid seeds chemical fertilizers and pesticides that have overtaken traditional agriculture and conflict with the ecology of the land Cheese comes from the land and is one of our most celebrated foods yet its current production methods are environmentally destructive corporately controlled and chemically dependent In its eating we re not celebrating the traditions of agriculture but rather pasteurization stainless steel production biotechnology and corporate culture If we gave its methods of production some thought we wouldn t want to eat the stuff It strikes me as absurd that there is no commonly practiced natural cheesemaking in North America Farmers practice ecologically inspired agriculture brewers are making beers and wines with only wild yeasts bakers are raising breads with heirloom sourdough starters and sauerkraut makers are fermenting their krauts with only the indigenous cultures of the cabbage But cheesemakers are stuck in a haze of food technology pasteurization and freeze dried commercial cultures and no one even questions the standard approach Other cheesemaking guidebooks insist that home cheesemakers adopt the industrial approach to cheese along with its tools and additives Their advice is based on standards put in place to make industrial production more efficient and a mass produced product safer But for small scale or home scale cheesemaking a different approach can work A Different Approach From the making of my very first Camembert I knew there had to be a better way than the cheesemaking methods preached by the go to guidebooks I just couldn t bring myself to buy a package of freeze dried fungus and my search for alternatives to commonly used cheese additives led to a series of discoveries about the origins of culture about the beauty of raw milk and about the nature of cheese that set in place the philosophies of this guidebook Not being one to blindly follow the standard path I set out to teach myself a traditional approach to cheesemaking The methods I share in this book are the result of 10 years of my own experimentations and creative inquiry with milk years of trial and error in my kitchen rediscovering one by one a natural approach to making every style of cheese I now practice a cheesemaking inspired by the principles of ecology biodynamics and organic farming it is a cheesemaking that s influenced by traditional methods of fermentation through which I preserve all my other foods and a cheesemaking that s not in conflict with the simple and noncommercial manner in which I live my life I now work with nature rather than against nature to make cheese When I teach my methods to students there is not a single book that I can recommend that explores a natural cheese philosophy and no website to browse but my own It is this absence of information in print and online that led me to write this book I never thought that I d be an author but I felt compelled to provide a compilation of methods for making cheese differently For it s about time for a book to lay the framework for a hands on natural and traditional approach to cheese The techniques presented in this book work And the photographs within featuring cheeses made by these methods are the only proof I can offer I wish I could share my cheeses with you so that you could taste how delicious a more naturally made cheese can be but unfortunately I cannot sell the cheeses I make because raw milk and food safety regulations restrict me from selling cheeses made in the small scale and traditional manner that I practice If small scale and traditional practices are constrained by regulations controlling cheese

production and access to raw milk perhaps it is time to question the authority of these standards We need a more radical cheesemaking a more natural approach to the medium of milk But it s surprising that it s come to me to lay this foundation for who am I but a small farmer and a humble cheesemaker

Instruments for Health Surveys in Children and Adolescents Karin Bammann, Lauren Lissner, Iris Pigeot, Wolfgang Ahrens, 2018-09-22 This book describes key methods and instruments for assessing diet related factors physical activity social and environmental factors physical characteristics and health related outcomes in children and adolescents These tools were developed and deployed within the framework of the pan European IDEFICS and I Family cohort studies These population based field studies were funded within the 6th and 7th European Framework Programme respectively and were intended to assess the prevalence and aetiology of lifestyle related diseases in children focusing on overweight and obesity and to develop effective strategies for primary prevention In the course of a decade we undertook a major research endeavour collecting standardised data from children families neighbourhoods kindergartens pre schools and schools in eight European countries employing a uniform cross cultural methodology This resulted in a rich picture of the daily lives and living contexts of children and their families Studies encompassing childhood and adolescence face the particular challenge of the transitions from pre school to primary school and from childhood to adolescence accordingly the instruments used need to be adapted to different developmental stages while maintaining their comparability across the age range In young children questionnaires have to be completed by proxies usually their parents while older children particularly adolescents can provide a major part of the requested information themselves This book presents suitable designs methods and instruments for data collection in studies of children and adolescents Each chapter explains the development and background of the instruments applied in the surveys and summarises the current state of knowledge All chapters were written by key experts in their respective research fields We are grateful for their valuable contributions and their enthusiastic support in producing this book which also presents survey experiences in which practice does not always follow theory Participants responses can on occasion be unexpected and unpredictable but meeting these challenges can also enrich epidemiological surveys and yield methodological refinements We sincerely hope that the book and the online material will be of considerable value to other research teams
