reveals how Liverpool's pre-eminence in the slave trade left an indelible scar on the psychogeography of the city. He also explores the roots of Liverpool's contrary nature: its rebelliousness and its hedonism, as well as some of the recent hurricanes that have battered the city, including the anger of Toxteth, the Hillsborough disaster and the murder of James Bulger. In this distinctly personal account, Lees defines the characteristics of this Celtic enclave with her loudmouthed, big-hearted people who have created a city quite different from anywhere else in the world.

The Cognitive Approach to Conscious Machines Pentti O. Haikonen, 2015-11-30. Could a machine have an immaterial mind? The author argues that true conscious machines can be built but rejects artificial intelligence and classical neural networks in favour of the emulation of the cognitive processes of the brain: the flow of inner speech, inner imagery and emotions. This results in a non-numeric meaning processing machine with distributed information representation and system reactions. It is argued that this machine would be conscious; it would be aware of its own existence and its mental content and perceive this as immaterial. Novel views on consciousness and the mind-body problem are presented. This book is a must for anyone interested in consciousness research and the latest ideas in the forthcoming technology of mind.

British Poetry 1964 to 1984 Martin Booth, 2025-05-30. First published in 1985, *British Poetry* presents a personal and political account of British poetry from 1964 to 1984. Martin Booth himself a poet, poetry publisher, critic and editor and the participant in poetry readings in Britain and overseas shows that British poetry underwent a renaissance in the ten years from around 1964: poetry became a major popular art form, shaking off its shackles of elitism and academicism; poetry readings flourished, whether live or on the air, and audiences increased; many new poets found willing publishers. He looks at the manner in which British poetry rose only to fall back into a morbid, sleek artiness where he sees it laying today once again a narrow art for the literary, educated and the initiated. The book aims to reverse this change of direction so that British poetry may once again have the impact it briefly had in its recent heyday. Martin Booth also provides a general guide to the period, with much comment included from those who were involved in the act of keeping British poetry going in those exciting years. He deals with the poets themselves, with the publishing of poetry and poetry magazines, and his non-literary, non-academic approach will appeal to all those who have an interest in modern British verse.
