

Paper Example: SWOT Analysis - Real Estate Industry Essay

I have developed a SWOT analysis for my professional and personal expertise relating to the real estate business. By tackling each level, the next level will demonstrate to be a gratuity for me while operating in the industry (Leung et al., 2011). I have to be able to produce from my strengths to prevail over my weaknesses and utilize opportunities. This will permit me to defeat my aims in life within the industry. Below is the results of my professional and personal SWOT analysis:

Strengths

Networking involvements, multi-tasking ability, creativity, fancy to succeed, quick response, strong reputation in the market for the existing agents, customer service, community involvement, ability to work independently able to change direction faster, a lot of time for excellent customer service, team player, and well educated about the property market (Leung et al., 2011).

My strengths will provide the best chance one could have to shine in this industry. Having the ability to work independently will be a significant upper hand when giving out listings (Leung et al., 2011). My strengths form an important part of my company. They are the things I do better than anybody else. They form the values which drive the organization's goals and objectives. My organization's aspects is also a strength because it brings me a clear advantage by providing production process of high quality. As a result of my organization's team analysis, I realized that the main strengths of the real estate business lie in its low overheads, technical expertise, and agility. These have allowed it to provide good customer service to a small client base.

Weaknesses

No market presence - innovate and be creative in advertising the company to make its presence; Vulnerable to staff turnover - screen well during interview process and provide an enjoyable environment for the staff; and Unreliable cash flow - seek advice from experienced business achievers in this industry (Leung et al., 2011). These weaknesses form part of the unpleasant experiences I have encountered in the organization.

Weaknesses are always inherent characteristics of my organization as they focus on procedures, people, systems, and resources. Weaknesses enable me to think about how I can improve on and the kind of activities I need to avoid. Imagining how other individuals in my organization view me is crucial in helping me come up with my weaknesses (Leung et al., 2011). This helps in uncovering the weaknesses I am always blind to. I do take time to examine why and how my competitors are performing better than me and find out the things I lack. The weaknesses of the organization are also to do with its size. The real estate industry will have to invest in training, improving the skills of its small staff, and focus on retention so it won't lose its key team members.

Swot Analysis Paper:

The SWOT Analysis Anja Bhm, 2009-09 Seminar paper from the year 2008 in the subject Business economics Marketing Corporate Communication CRM Market Research Social Media grade 1.0 University of Applied Sciences Berlin language English abstract Marketing offers numerous valuable tools to analyze a company's current situation. Though most of them have the weakness of providing only a very isolated view that is not suitable for a long-term entrepreneurial decision. The SWOT analysis however pursues an integrated approach including key company and environmental variables. The objective is the confrontation of the company's internal strengths and its weaknesses as well as company external business opportunities and risks in order to generate possible strategic options. The SWOT analysis particularly supports a combined and integrated approach of the current company situation enabling well-balanced and comprehensive decisions. One main benefit is thus the reduction of complexity through the integrated approach leaving the key factors and strategies as analytical residue. In practice the SWOT method is a well-established tool to analyze business units in larger companies and smaller start-ups in particular during their launch. The SWOT analysis though reveals limited possibilities when analyzing all business units of large companies. For this task other more holistic approaches as the share holder value concept or the portfolio analysis are appropriate. However this large field of tools will not be treated in this assignment. The SWOT analysis is though despite its disadvantages one of the most important instruments for the internal analysis of a company's situation that in every case delivers a pretty comprehensive and resilient foundation for further entrepreneurial decisions and strategic planning.

Sustainable Development and Planning VIII C.A. Brebbia, S.S. Zubir, A.S. Hassan, 2017-01-30 The 8th International Conference on Sustainable Development and Planning is part of a series of biennial conferences on the topic of sustainable regional development which began in Greece in 2003. The papers included in these proceedings report on the latest advances from scientists specialising in the range of subjects included within sustainable development and planning. Planners, environmentalists, architects, engineers, policy makers and economists have to work together in order to ensure that planning and development can meet our present needs without compromising the ability of future generations. The use of modern technologies in planning gives us new potential to monitor and prevent environmental degradation. Problems related to development and planning which affect both rural and urban areas are present in all regions of the world and accelerated urbanisation has resulted in both the deterioration of the environment and quality of life. Urban development can also intensify problems faced by rural areas such as forests, mountain regions and coastal areas which urgently require solutions in order to avoid irreversible damage. The papers in the book cover the following topics: City planning, Regional planning, Rural developments, Sustainability and the built environment, Sustainability indicators, Policies and planning, Environmental planning and management, Energy resources, Cultural heritage, Quality of life, Community planning and resilience, Sustainable solutions in emerging countries, Sustainable tourism, Learning from nature, Transportation, Social and political issues and
