

Basic Physics for Science & Engineering 1

PHYS 0174

4 Credits

Description: This is the first term of a two-term introductory sequence in physics for science and engineering students.

Prerequisite: Calculus is needed and should be taken at least concurrently. The laboratory course associated with this sequence is taken after Physics 0174.

Grading: The grade is determined primarily by three exams during the term and a cumulative final exam. Other work, such as quizzes and homework, may make some contribution to the grade. Approximately half of the class time each week is spent in covering new material. The remaining time is devoted to activities such as problem solving, demonstrating experiments, questions, and discussion.

Textbooks: At the University of Pittsburgh, the latest edition of *Fundamentals of Physics* by Halliday, Resnick, and Walker is used. Any comparable, calculus-based text that covers all of the material in this course outline is acceptable as an alternative.

The following topics should be covered. The order of topics may be altered as long as all of the material listed before each exam is covered before that exam is given.

1. Measurement

- Unit checking
- Changing units
- Systems of coordinates

2. Vectors
