The SWOT Analysis Anja Bh̄m,2009-09 Seminar paper from the year 2008 in the subject Business economics Marketing Corporate Communication CRM Market Research Social Media grade 1 0 University of Applied Sciences Berlin language English abstract Marketing offers numerous valuable tools to analyze a company's current situation Though most of them have the weakness of providing only a very isolated view that is not suitable for a long term entrepreneurial decision The SWOT analysis however pursues an integrated approach including key company and environmental variables The objective is the confrontation of the company's internal strengths and its weaknesses as well as company external business opportunities and risks in order to generate possible strategic options The SWOT analysis particularly supports a combined and integrated approach of the current company situation enabling well balanced and comprehensive decisions One main benefit is thus the reduction of complexity through the integrated approach leaving the key factors and strategies as analytical residue In practice the SWOT method is a well established tool to analyze business units in larger companies and smaller start ups in

particular during their launch The SWOT analysis though reveals limited possibilities when analyzing all business units of large companies For this task other more holistic approaches as the share holder value concept or the portfolio analysis are appropriate However this large field of tools will not be treated in this assignment The SWOT analysis is though despite its disadvantages one of the most important instruments for the internal analysis of a company s situation that in every case delivers a pretty comprehensive and resilient foundation for further entrepreneurial decisions and strategic planning

SWOT Analysis Nadine Pahl,Anne Richter,2009-04 Research Paper undergraduate from the year 2007 in the subject Business economics Marketing Corporate Communication CRM Market Research Social Media grade 1 3 University of Applied Sciences Berlin course Marketing language English abstract Due to strong competition and a continuous market change most companies engage in strategic planning today to become or stay competitive in the long run Strategy is all embracing Strategy has to capture internal and external aspects that means to comprise competencies and market opportunities Strategy has to keep in view the own company the customers and the competitors The challenge is to create customer values and competitive advantages to assure benefits and growth As a result the starting point of every strategic decision demonstrates the recognition and the analysis of the company s current situation containing a high variety of parameters These parameters are generally defined by the company s influence into internal and external parameters However the understanding of the company s situation is only defined in absolute by analysing parameters and its bilateral dependencies Therefore the combination of the company s internal factors and the external environmental circumstances presents the basis for the strategy development and the resulting organisational marketing goals and application of the marketing instruments The SWOT analysis is a strategic planning tool used to evaluate the Strengths Weaknesses Opportunities and Threats of a company It provides information that is helpful in matching the company s resources and capabilities to the competitive environment in which it operates The resulting SWOT matrix contrasts the results of the internal analysis strengths and weakness and the external analysis opportunities and threats to define strategic fields of action That application of a SWOT analysis is therefore instrumental in strategy formulation and selection **Rethinking Decision-Making Strategies and Tools** Maria Palazzo,Alessandra Micozzi,2024-02-16 Readers will be enabled to compare contrast and comprehend how the decision making strategies and tools from different lenses are delivered in different parts of the world The text includes an interesting mix of theory primary research findings and practice that will appeal to students academics and practitioners alike *Handbook of Research on Islamic Social Finance and Economic Recovery After a Global Health Crisis* Kassim, Salina,Othman, Anwar Hasan Abdullah,Haron, Razali,2021-04-30 Social financial reporting as an economic tool presents the firm as a socio economic unit with empowered social capital to enable a sustainable economic solution particularly in response to the COVID 19 pandemic Islamic social finance ISF is a corporate social responsibility initiative in the form of humanitarian and socio development programs by Islamic financial institutions and Shariah compliant
