MY AUTOBIOGRAPHY

I am Alea Mae D. Benitez, I was born on May 7, 2000 in Pasay City, Philippines. We are two siblings in the family, I am the second child. My mother's name is Divina D. Benitez from Sorsogon, Bicol. My father's name is Nels Benitez. And he is from Camarines Sur, Bicol.

During weekends, we usually spend our days in the family. We always go to church. We helped each other in our activities. My family was a happy and loving family. I had a happy childhood living with my parents and my siblings. I completed my elementary education at Don Carlos Velez Elementary School. During my junior high school, I completed my junior high school at President Corazon Aquino National High School and I usually spend my time with my friends. Since the lockdown, I have a daily routine with my friend for a Google meet until dawn, and we do various things when we do, such as talk about what is going on in our lives and watch movies that have been shown several times. We have been watched pitch perfect all seasons. I finished it several times. When I am not with them, I watch shows like Mr. Queen and Ghost Doctor. And I am a senior at Pasay City South High School, I will do everything I can to get into a good university where I can go to college.

Modern Mathematics Dirk De Bock, 2023-03-08 The international New Math developments between about 1950 through 1980 are regarded by many mathematics educators and education historians as the most historically important development in curricula of the twentieth century It attracted the attention of local and international politicians of teachers and of parents and influenced the teaching and learning of mathematics at all levels kindergarten to college graduate in many nations After garnering much initial support it began to attract criticism But as Bill Jacob and the late Jerry Becker show in Chapter 17 some of the effects became entrenched This volume edited by Professor Dirk De Bock of Belgium provides an outstanding overview of the New Math modern mathematics movement Chapter authors provide exceptionally high quality analyses of the rise of the movement and of subsequent developments within a range of nations The first few chapters show how the initial leadership came from mathematicians in European nations and in the United States of America The background leaders in Europe were Caleb Gattegno and members of a mysterious group of mainly French pure mathematicians who since the 1930s had published under the name of a fictitious Nicolas Bourbaki In the United States there emerged during the 1950s various attempts to improve U S mathematics curricula and teaching especially in secondary schools and colleges This side of the story climaxed in 1957 when the Soviet Union succeeded in launching Sputnik the first satellite Undoubtedly this is a landmark publication in education The foreword was written by Professor Bob Moon one of a few other scholars to have written on the New Math from an international perspective The final epilogue chapter by Professor Geert Vanpaemel a historian draws together the overall thrust of the volume and makes links with the general history of curriculum development especially in science education including recent globalization trends Schooling for Tomorrow's America Marcella L. Huber-Warring,2008-04-01 For readers new to the field of multicultural education and human relations education the recency of these publications heralded as seminal may be confusing for certainly the concepts building the field of multicultural education and human relations education have been around much longer True But for the first time we found the conceptual framework guiding principles and critical works across disciplines and fields in Smith s encyclopedic organization Because of the comprehensive nature of Pritchey Smith s knowledge bases they have been employed as the organizing themes for this volume I would clarify that I have not burdened authors to study Smith s analysis and then apply it to their works the categorization is my own And as is true of any topic the interpretation and application may be broadly applicable One of my major goals in founding this series has been to further develop the knowledge bases with voices from those in the trenches literally and figuratively and at the chalkface while proverbial for some parts of the world chalk remains a teaching staple in many regions of the world Throughout this volume authors will explore and research their own discoveries on this journey narratives of crossing cultures and developing communities reconceptualizing democracy and reinterpreting traditions seeking solidarity and sowing the seeds of social justice Through critical reflection in the shade of these giants the reader may discover Ming Fang s bamboo tree
