Tomos Bt Manual:

BTV # 12: Manual de investigación teológica Nancy Jean Vyhmeister, 2013-06-25 Trabajos de investigación de Nancy Vyhmeister se está convirtiendo con rapidez en el libro de texto de referencia modelo para redactar documentos de investigación en el campo de la religión y la teología. El mismo conduce al estudiante desde el principio de la asignación de un trabajo a través de la fase de investigación hasta que el trabajo es terminado. Esta segunda edición ofrece mejoras y un material adicional para cosas tales como el creciente campo de investigación en línea y cómo hacer la investigación relativa a la iglesia de una manera profesional. Los recursos para hacer la investigación se actualizan en todo el libro. Manual de identificación de especies maderables objeto de comercio en la Amazonia colombiana René López Camacho, Dairon Cárdenas López, 2002-12-10 El Manual de identificación de especies maderables objeto de comercio en la Amazonia colombiana es una herramienta técnica que permite a las autoridades ambientales policivas y judiciales disponer de una serie de elementos que faciliten la identificación de especies maderables objeto de comercio que se encuentran incluidas en los Apéndices de la CITES y o bajo algún grado de amenaza en el país. En términos generales cuando las autoridades ambientales realizan controles a la movilización de madera recurren al nombre comercial o común con que se denota en la región. Posteriormente se pueden conjugar elementos como la procedencia, la información del permiso de movilización y la utilización de características generales de la madera para tener una aproximación al nombre científico de la especie. En todos los casos se evalúa la legalidad de movilización y comercio: esta o no listada la especie en los Apéndices de la CITES. Aunque el manual constituye una herramienta fundamental para las autoridades ambientales en la identificación de maderas objeto de comercio en caso de dudas persistentes en relación con la especie y la necesidad de un informe pericial, ser necesario recurrir a especialistas en identificación anatómica de maderas o a la corroboración mediante muestras botánicas o de propiedades físico-químicas de la madera. El manual busca facilitar la identificación de las especies analizadas para su conservación, manejo y protección en el marco de las políticas trazadas por la CITES, así mismo permitir a las autoridades aduaneras ambientales y policivas fortalecer los controles al comercio de las especies maderables en la región identificando con facilidad las más comercializadas en la zona.
