Making Sense of Journals in the Physical Sciences Tony Stankus, 1992 The author lays out the patterns of subject specialization within chemistry and physics in non technical language emphasizing the often colourful people and events that influenced the founding of new areas of research and their journals

Multidimensional Journal Evaluation Stefanie Haustein, 2012-04-26 Scientific communication depends primarily on publishing in journals The most important indicator to determine the influence of a journal is the Impact Factor Since this factor only measures the average number of citations per article in a certain time window it can be argued that it does not reflect the actual value of a periodical This book defines five dimensions which build a framework for a multidimensional method of journal evaluation The author is winner of the Eugene Garfield Doctoral Dissertation Scholarship 2011
