Exploring Classical Greek Construction Problems with Interactive Geometry Software Ad Meskens, Paul Tytgat, 2017-02-02 In this book the classical Greek construction problems are explored in a didactical enquiry based fashion

using Interactive Geometry Software IGS The book traces the history of these problems stating them in modern terminology By focusing on constructions and the use of IGS the reader is confronted with the same problems that ancient mathematicians once faced The reader can step into the footsteps of Euclid Vi te and Cusanus amongst others and then by experimenting and discovering geometric relationships far exceed their accomplishments Exploring these problems with the neusis method lets him discover a class of interesting curves By experimenting he will gain a deeper understanding of how mathematics is created More than 100 exercises guide him through methods which were developed to try and solve the problems The exercises are at the level of undergraduate students and only require knowledge of elementary Euclidean geometry and pre calculus algebra It is especially well suited for those students who are thinking of becoming a mathematics teacher and for mathematics teachers Scientific and Technical Books in Print ,1972
