ENRON CORPORATION

Synopsis

Arthur Edward Andersen built his firm, Arthur Andersen & Company, into one of the largest and most respected accounting firms in the world through his reputation for honesty and integrity. "Think straight, talk straight" was his motto and he insisted that his clients adopt that same attitude when preparing and issuing their periodic financial statements. Arthur Andersen's auditing philosophy was not rule-based, that is, he did not stress the importance of clients complying with specific accounting rules because in the early days of the U.S. accounting profession there were few formal rules and guidelines for accountants and auditors to follow. Instead, Andersen invoked a substance-over-form approach to auditing and accounting issues. He passionately believed that the primary role of the auditor was to ensure that clients reported fully and honestly to the public, regardless of the consequences for those clients.

Ironically, Arthur Andersen & Co.'s dramatic fall from prominence resulted from its association with a client known for aggressive and innovative uses of "accounting gimmicks" to window dress its financial statements. Enron Corporation, Andersen's second largest client, was involved in large, complex transactions with hundreds of special purpose entities (SPEs) that it used to obscure its true financial condition and operating results. Among other uses, these SPEs allowed Enron to download underperforming assets from its balance sheet and to conceal large operating losses. During 2001, a series of circumstances, including a sharp decline in the price of Enron's stock, forced the company to assume control and ownership of many of its troubled SPEs. As a result, Enron was forced to report a large loss in October 2001, restate its earnings for the previous five years, and, ultimately, file for bankruptcy in December 2001.

During the early months of 2002, Andersen became the focal point of attention among law enforcement authorities searching for the parties responsible for Enron's sudden collapse. The
