Super Teacher Math:

The Superteacher Project Gordon Korman, 2023-02-07 It's The Unteachables meets I Robot in another funny middle school tale from Gordon Korman. It's the start of a new school year and Oliver is looking forward to a seventh grade year full of spitballs, jokes and pranks with his friend Nathan. And their new homeroom teacher Mr. Aidact looks like a prime target. He's an odd duck with a weird stilted vocabulary, an unusual way of looking at things, and a strangely old student teacher constantly in tow. He also has a seemingly superhuman ability to detect and defuse almost every one of Oliver's schemes. But that's not all of it. Mr. Aidact seems to be teaching pretty much every subject. He's willing to take over jobs no other teacher will like: supervising detention and coaching the field hockey team. Oliver and Nathan are determined to find out what is up with this guy. What they uncover is out of this world. Mr. Aidact is, in fact, superhuman: he's an android, a secret project of the Department of Education. And when the secret leaks out, the school and the PTA are in an uproar and calls for his deactivation are loud and clear. Can Oliver and his friends turn this plan around and save the teacher they've grown to love and appreciate?

Success Secrets of Super Teachers Ernest D. Pierce, M.A., 2010-07-22 Ernest D. He has taught at all grade levels and created innovative education programs for students, teachers, and parents.

Opening the Research Text Elizabeth de Freitas, Kathleen Nolan, 2007-12-19 In this chapter we interrogate the debate between mathematicians and mathematics educators. This debate is widely recognized in the United States for instance, where the term math wars is often used in reference to the heated disagreements between mathematicians and mathematics educators. Such recognition might suggest that this topic itself has relevance both for the academy and for educational policy pertaining to mathematics education. We propose to locate this debate unavoidably whenever and wherever mathematics education is written. Our aim is to show how the debate itself gives rise to the inscription mathematics education. Indeed, we contend that mathematics education cannot be defined outside of or prior to the debate for it is precisely through the debate that it is constituted as a domain for deliberation. The debate is more primordial than any epistemic or domain implied by it. In other words, we argue that mathematics and mathematics education do not exist epistemically prior to the debate. In order to engage this issue, we consider a transcription of a panel debate between mathematicians and mathematics educators held in Brazil in 1998. There is at least a double meaning for the word debate: it may mean a meeting having a beginning and an end, well localized in space and time, and with a specific proposal or focus, as in the following sentence: "I am going to see on TV the debate between Bush and Blair tomorrow at 5 pm."

Succession Planning Christopher M. Parfitt, 2022-12-13 Succession planning is a concept not well known nor used in education. Businesses, non-profit entities, medical organizations, and the military have used many of the concepts for decades with varying degrees of success. A framework and practical guidelines are provided for anyone with hiring authority or interest in leadership development in educational organizations. The identification of

future talent the targeted and specific development and mentoring and the retention of the most promising employees comprise the three major components to a quality plan Most importantly the unique organizational culture must be considered across every phase A lack of planning can be costly and detrimental to performance which in an educational setting equates to lower student achievement A quality succession plan can be used to foster engagement from all levels of stakeholders and ensure qualified individuals are prepared to assume positions of greater authority at every level of the organization There is no universal answer no one size fits all approach however with strategic initiatives and the proper support from senior leaders a leadership pipeline can be established in any educational organization not just for the present but for future needs
