Mindful Crafts as Therapy Cynthia Evetts, Suzanne Peloquin, 2017-04-28 Arts and crafts were one of the very first therapies employed by occupational therapists. Today crafts are still employed as effective interventions for clients with mental health disorders, physical dysfunctions, cognitive issues, and sensory concerns in hospitals, outpatient clinics, veterans centers, schools, skilled nursing facilities, or community settings. Step by step, the authors show you how to use a wide range of novel and highly engaging crafts. They explain how to connect the key tasks associated with an activity to functional outcomes and how to modify them to meet the specific needs of individual patients. They also address the issues of documentation and reimbursement.

Martha Stewart's Favorite Crafts for Kids Editors of Martha Stewart Living, 2013-06-18 Martha Stewart's Favorite Crafts for Kids focuses on craft projects that children aged three to twelve can make with their parents. These projects are fun yet serve a practical purpose: children can wear, decorate, and play with what they make. Filled with ideas for a range of ages, skill levels, and interests, this book lets children's creativity run wild while creating precious memories as parents and kids learn and create as a team.

Fun with Felt Jane Yates, 2016-12-15 There are endless ways to get creative with felt. This book introduces readers to crafting with this affordable and versatile material. Readers will learn important techniques for making several projects such as a felt pouch, bird ornament, and a monster stuffie. Easy and accessible instructions walk readers through each project while photographs illustrate each step. Young crafters will have fun working on their very own felt masterpieces.

Play at the Center of the Curriculum Judith Lieberman Van Hoorn, 2003 This is the third edition of the book that takes to heart the adage: Play is children's work. Believing that play is a primary factor in the development of intelligence, personality, competencies, self-awareness, and social awareness, the authors demonstrate how to draw from spontaneous play both the methods and the content of a successful curriculum for children from birth to age eight. The book introduces the theories of Piaget, Vygotsky, Erikson, Mead, and many contemporary researchers; explores the traditional curriculum arenas of early childhood education and includes discussion of the role of work, adult models, and authority in children's play. For teachers specializing in Early Childhood Education, pre-school teachers, day-care personnel, parents, and anyone with an interest and involvement in the education, development, and care of young children.
